

CENTRAL SANITATION FACILITY

Description

Anne Arundel County is constructing the Central Sanitation Facility in Millersville, Maryland near the intersection of East-West Boulevard and Maxwell Frye Road. This location is within the County complex that includes Police, Fire, Animal Control, Garage and Central Water Facility headquarters. Access to the facility will be via Maxwell Frye Road and one new East-West Boulevard entrance. The work includes both the construction of administrative and maintenance facilities within the existing Central Water Facility Complex and stream restoration adjacent to the site. This facility will centralize the operational base for water and wastewater utility operations staff. The Administration Building is anticipated to receive a LEED (Leadership in Energy and Environmental Design) Silver Rating. Construction will provide environmental benefits including protecting the Severn River watershed, augmenting 17 acres of forest conservation with over 1,600 new tree plantings, enhanced water quality treatment (e.g. reducing levels of nitrogen and phosphorus), groundwater recharge, stormwater energy dissipation and preservation of existing wetlands adjacent to the Administration Building.

Benefits

The completed facility will allow efficient service to users of the County as a centralized operation base for the County's water and wastewater utility operations staff.

Project Status

Administration Building interior drywall and rough-in in progress. Electrical and gas service available. Maxwell Frye Road relocation begins in March 2011. Spring planting begins in April 2011.

Project Information

Design Project Manager	Phil Guyer 410-571-0092
Design Consultant	Wheeler Goodman Masek, Architecture and Interiors
Contractor	Morgan-Keller, Inc.
Inspection Manager	Arcadis
Projected Construction Cost	\$ 11.1 M
Design Notice to Proceed	September 2005
Construction Notice to Proceed	August 2009
Projected Completion Date	September 2011
