

**Third Goal for FY 2004 – *Educate and prepare Department personnel for the potential threat of foreign and domestic terrorism and terrorist acts.***

The three key objectives of this goal were:

- ❖ Continue training in understanding terrorist's use of Nuclear, Biological, and Chemical (NBC) weapons.
- ❖ Continue to develop intelligence and thwart the capabilities of NBC attacks, to include alerting County citizens of potential NBC threats.
- ❖ Ensure that all personnel know their individual responsibilities relating to the Emergency Mobilization Plan through roll call training.

**Objective One**

This first objective was met through identifying and developing training opportunities to address ways to recognize and respond to terrorist activities, to understand the use of weapons of mass destruction, and to learn terrorist methods for deploying NBC weapons.

**Objective Two**

The second objective was met through the assignment of a second Homeland Security detective to the Department's Intelligence Unit to interact with federal and state officials to coordinate intelligence gathering and information sharing to promote measures designed to thwart terrorist activities. A website has been established to alert and keep citizens informed of developments and to promote awareness to recognize potential NBC threats.

**Objective Three**

The final objective was met through the dissemination of information throughout the Department to promote awareness to the Emergency Mobilization Plan.
