

Beverly-Triton Beach Park Recommendations

Submitted to AA Rec & Parks 9/9/16

1. First and foremost Beverly-Triton needs improvements that will restore its historic use as a public swimming beach. The scale of existing public investment along with the limited locations suitable for public swimming makes this the #1 priority.
2. Picnic tables, shelters and a playground are basic improvements necessary for public enjoyment of a public park.
3. A parking plan should be flexible enough to adjust to demand. The RKK report cites 150 spaces as a minimum. Expansion/overflow parking needs to be planned for.
4. The plan needs to include an effective communication strategy to notify visitors if the park reaches capacity.
5. Establish safe convenient entry/access points for all types of cartop boat users. R&P should specifically seek unique user input.
6. Fishing piers into the interior ponds.
7. Paddle-in campsites to make B-T Beach Park a useful water-trail element.
8. In addition, all the RKK list of facilities and activities dated June 23, 2016 should be incorporated into the park
