### **Anne Arundel County Department of Inspections and Permits Announces Updated Stormwater Management Data Form**

Anne Arundel County Department of Inspections and Permits announces an updated version of the Stormwater Management Data Form will be available July 1, 2020 on the Department's webpage. The Stormwater Management Data Form is required for all grading permit applications.

The form was developed by DPW to comply with reporting requirements for the County's MS4 permit, effective December 1, 2014 for all new grading permit applications. The form was recently updated and becomes effective July 1, 2020.

In the near future, the updated form will be available in Excel format on the following link: <https://www.aacounty.org/departments/inspections-and-permits/permit-center/forms-and-publications/>.

Changes include the addition of maintenance responsibility and comments columns.

The Data Form Guidance references Appendix B of the MS4 permit, which includes the necessary information to complete several of the required fields for each facility, specifically MOE BMP Class and MOE BMP TYPE (pg. 36-38), and MOP LAND USE CODE (pg. 38-40).

Note that not all of the information in Appendix B is required in order to complete the form. DPW will complete STORM\_ID and USGS 12-Digit HUC.

The updated Stormwater Management Data Form shall be used with all new grading permit applications submitted on or after July 1, 2020. This includes revisions to grading permits when changes to the approved Data Form are proposed.

For more information on the Data Form, please contact Raghu Badami at 410-222-6137.
