

COVID UPDATE:

aaccounty.org/coronavirus

A weekly update from County Executive Stuart Pittman

February 6, 2021

COUNTY EXECUTIVE'S MESSAGE

We are thrilled to see COVID-19 case rates and hospitalizations on the decline, but frustrated that Maryland has been reducing vaccine allocations to local health departments as they prepare to build pharmacy chain capacity and state-run sites.

Until Maryland creates a single pre-registration system, or allows counties to centralize the process for our residents, we will continue to share with you information about accessing private and state vaccines as it becomes available. We are also working to establish partnerships with those providers to coordinate efforts.

Of the 3,400 doses that will come to Anne Arundel County Department of Health this week, 1,500 will go to seniors 75 and older, 1,500 will go to educators, and 400 will go to healthcare workers and first responders from Phase 1A. Of the educator doses, 1,000 go to our Fire Department / AACPS partnership for public school employees, while 500 go to non-public educators and childcare providers. All non-AACPS vaccinations are accessed through aaccounty.org/covidvax.

AA County Health Department emails invitations to schedule appointments from among the 116,000 pre-registered at aaccounty.org/covidvax using random selection software that maintains an outcome consistent with group prioritization and county demographics.

I want to thank all county residents for the personal sacrifices that they have made to save lives during this pandemic, and county public servants for their extraordinary performance on behalf of our residents. Please join our weekly briefings on [Facebook](https://www.facebook.com/aacounty) each Tuesday at 11 am and sign up for our weekly newsletter [here](#).

UPDATED HEALTH METRICS

As of 2/6/21:

- 33,673 total confirmed cases and 475 deaths
- 44,623 first vaccine doses administered
