What is Respite Care?

Caregiving is a hard job—and all caregivers need a break at times. Respite care provides that break, whether it be an occasional night out or ongoing care while the caregiver attends his or her job. Respite care helps the caregiver—and the person they are caring for. When caregivers are rested and less stressed, they are able to provide better care.

In-home aides also provide companionship and support for seniors living alone, allowing them to stay in their homes.

Who Provides Care?

All Respite Workers undergo a stringent application process before being placed on the registry, to include a criminal background check. Applicants are then required to attend the program’s orientation training program, which include both the Dementia Live® experience and ethical standards training, which is facilitated by Department of Aging and Disabilities staff. Home Health Aides have completed the Certified Nursing Assistant training.

Background checks are completed annually on active workers; Respite Workers are also required to complete additional training annually.

The Respite Care workers referred to you are self-employed, independent contractors in good standing on the Respite Care Referral Program Registry.
