

Mental Health Services

Mental Health Services are available upon request. Inmates may request non-emergency services through the use of a sick call request form or by notifying their Case Manager. Trained clinicians are on staff; available during regular business hours and will schedule appointments as needed. Separately, the Detention Center operates a mental health unit. Inmates are referred, screened and selected for participation by staff responsible for the unit. Case management services are also provided to identified inmates to assist in the continuation and coordination of services in the community.
