Category Drug Class	Other Considerations
All Drugs	On a quarterly basis, new and existing products - including limited source generics, products with significant cost inflation, and specialty and non-specialty products - may be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options remain available on the formulary and may result in removal, addition or deletion of a product.
Autoimmune and Hepatitis C *	For some clients, an Indication-Based Formulary will be utilized for products in these classes and may result in additional removals for certain conditions only.
Drugs for Infusion Into Spaces Other Than the Blood	A drug that must be infused into a space other than the blood will generally not be covered under the prescription drug benefit.
New-to-Market Agents ⁷	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.

The listed formulary options are subject to change.
