This checklist is being provided as a general guide for identifying the **minimum** features that should be addressed prior to submitting the plans for review.

- Plans are to be designed based on the standards set forth in the appropriate design manuals as stipulated in the Anne Arundel County Code.
- The design consultant, by assigning his/her seal and signature, certifies that the plans were completed in accordance with the current design standards.
- Plans that are incomplete as per the checklist items will result in an incomplete review. Plans will be returned to the consultant and the resubmittal will be considered a first submittal in the review process.
- Efforts should be made to limit the number of plan sheets to four (4).
### Sketch Plan—Preliminary Plan Checklist (Also used as SWM Concept Plan for other development projects)
