Please join us for a discussion on the plans for the Broad Creek Stream Restoration

To meet the requirements of the NPDES MS4 permit, Broad Creek has been identified for restoration. This stream restoration project is located on the Camp Woodlands property off Riva Road in Annapolis, MD. WPRP staff will present the goals and plans for the project.

In its existing condition, this section of Broad Creek is highly eroded making it a source of nutrient and sediment loads to the South River. The primary goals of this project are to minimize bank erosion, provide vertical and lateral stability within the stream channel, and to restore the valley wide floodplain. Ultimately, this project will provide improved water quality in the South River and the Chesapeake Bay.

Project Number: B559202

Grading Permit #: G02018254

Proposed Modifications: streams, stream buffers, wetlands, wetland buffers, floodplains, forest etc.

Project Manager: Jeff Ratteree 410-222-0524; pwratt23@aacounty.org
