Household Hazardous Waste Alternatives

Instead of this: You can use this:

Household Cleaner
Combine 1 tsp liquid soap, 1 tsp borax, 1 squeeze of lemon, and 1 qt warm water.

Window Cleaner
Combine 2 tsp vinegar with 1 qt warm water.

Disinfectant
Combine 1/4 cup borax with 1/2 gallon hot water.

Drain Cleaner
Pour 1/2 cup borax in drain followed by 2 cups boiling water.

Toilet Cleaner
Pour 1/4 cup baking soda into bowl and drizzle with vinegar. Let sit for 1/2 hour. Scrub and flush.

Mildew Remover
Dissolve 1/2 cup vinegar with 1/2 cup borax in warm water.

Carpet Cleaner
Sprinkle cornstarch or baking soda on dry rug and vacuum.

Furniture Polish
Mix two parts olive/vegetable oil to one part lemon juice. Apply mixture and let stand for several hours. Polish with dry, soft cloth.

Silver Polish
Soak items in 1 qt warm water mixed with 1 tsp baking soda, 1 tsp salt and a small piece of aluminium foil.

Facility Directions

GLEN BURNIE
Take Route 2 to Dover Road (1 block south of Glen Burnie Mall). The facility is located at the end of Dover Road.

MILLERSVILLE
From Route 32 West, take the Burns Crossing Road exit. Turn right at the first traffic light onto Burns Crossing Road. Travel 1/4 mile to another traffic light at Pascal Blvd. This is the entrance to the landfill.

DEALE
Take Route 2 toward Route 258. Turn onto Route 258 (East Bay Front Road). Travel 3/4 of a mile and turn left onto Nutwell Sudley Road. The facility is located on the left.

Gas & Kerosene

Cleaners & Solvents
Oil-Based Paints

Did You Know?
- Americans generate 1.6 million tons of household hazardous waste (HHW) per year.
- The average home can accumulate as much as 100 pounds of HHW in the basement, garage and other storage areas.
- In 2018, Anne Arundel County paid $291,000 to dispose of HHW received from residents.

Did You Know?
You Can Help Reduce Your HHW Disposal Costs

Reduce Your HHW
The best way to deal with HHW is to avoid creating it. The following tips can help you do just that.

- Purchase Less. Buy only the amount you need, even if a larger container offers a price discount.
- Use it up. Use up all of the products you have before you buy any more. Most products do not expire.
- Give it away. Find someone or any charity that can use your excess material.
- Simplify. Use multi-purpose cleaners rather than having a full collection of specialized products.
- Use safer alternatives. Buy less-toxic alternatives. Avoid the ones with the words “poison” or “danger” on the label. These safer items can be found in your local grocery store.

Facility Directions

MILLERSVILLE
Only Accepted During Events
Schedule available online at www.aacounty.org/departments/public-works/waste-management or call 410-222-7951

GLEN BURNIE
Northern Recycling Center
100 Dover Rd., Glen Burnie (near the Glen Burnie Mall)

MILLERSVILLE
Millersville Landfill & Resource Recovery Facility
389 Burns Crossing Rd., Severn (off Route 32)

Disposing of Household Hazardous Products Safely

Household Hazardous Waste Drop-off Days provide opportunities for County residents to safely dispose of products containing harmful chemicals.

Items accepted include:
- Oil-based paints & staining agents
- Paint solvents
- Pesticides
- Household & automotive cleaners
- Oil and antifreeze contaminated with water or other products
- Pool chemicals
- Gasoline, Kerosene & other fuels
- Hand-held signal, smoke & roadside flares
- AERIAL & PARACHUTE FLARES ARE NOT ACCEPTED
- Asbestos / Asbestos shingles & tiles
- MUST BE WETTED AND DOUBLE-BAGGED.
- LIMIT = FOUR 40 lb. BAGS per RESIDENT per EVENT.

Items Not Accepted

Medical Waste – Needles and unwanted medications are accepted year round at all police stations. Properly packaged materials are also accepted as trash curbside and at any recycling center year round from residential customers ONLY.

Compressed Gas Tanks – Contact the supplier or manufacturer.

Explosives – Call Anne Arundel County Fire Marshal Division at 410-222-7884 for assistance.

Ammunition – Call Anne Arundel County Police Department at 410-222-8610 for assistance.

Smoke Detectors – Mail back to the manufacturer or accepted as trash curbside and at any recycling center year round.

Fire Extinguishers – Contact the supplier or manufacturer.

Safety Tips

Please follow these tips for quick and safe disposal:
- Read labels for safe handling instructions.
- Keep products in their original containers.
- Place several small containers together in a non-returnable box for quicker processing.
- Do not mix products.

Cooking Oil and Latex Paint

If you have no future use for your excess latex paint, please give it to a friend or donate it to a local charity.

Cooking oil and latex paint are not accepted curbside for disposal. They are not hazardous and are accepted for disposal at all convenience centers. For disposal, please seal the liquid in its original container and bring the sealed container(s) to any convenience center year round. Do not mix oil with paint.

Moving?

Most moving companies will not transport oil-based paint, solvents, pesticides, weed killers, combustibles, or other hazardous materials. Be sure to plan ahead and visit us at one of the locations and dates listed on the front of this brochure.

For more information call 410-222-7951 or visit www.aacounty.org/departments/public-works/waste-management

How Much of All Hazardous Material is Recoverable?

Over half of all hazardous materials accepted are recycled. Other hazardous materials that are dropped off are either disposed of in hazardous waste landfills or incinerators. These services are provided by a private company under contract to the County.

Hazardous Waste Facts and History

Anne Arundel County began collecting household hazardous waste in 1988. Since then, the program has served over 82,000 customers, removing $6,992,559 pounds of toxic chemicals and household/boating products from the waste stream.

Unless used or disposed according to directions, household chemicals present a threat to the environment. Special handling is required for proper disposal.

In the past, common home, garden and automotive products were tossed into the household trash and buried in landfills. However, we now know this presents an increased threat to the surface and ground water that we drink.

As rain percolates through a landfill, it picks up and carries with it traces of chemicals in the layers of trash. Eventually, both the rain and the chemicals could reach public and private drinking supplies and other bodies of water.

New disposal areas at the Millersville landfill, called “cells,” are double-lined and include a system that collects any liquids which may pass through the first liner. This liquid is removed, treated, and disposed of at a County water reclamation facility.

When full, cells are “capped” in order to prevent rain from soaking in. Despite these advances in landfill management, it is still important that the waste stream be detoxified. We rely on programs like the Household Hazardous Waste Drop-off Day and your cooperation to make this happen.

Individuals needing special accommodations should contact the Recycling Division at least seven (7) working days prior to the Household Hazardous Waste Drop-off Day at 410-222-7951, or the Maryland Relay Service at 711.
