

RECYCLING - A LIFE CYCLE

Recyclable items are dropped off at the recycling center.

Anne Arundel County transports recyclables to the recycling facility where they are sorted and processed.

The recycling facility sells the items to various manufacturers. The manufacturers use the recycled material to make new products.

The recycled items come back to consumers as new items such as bottles, paper, and even carpet.

Recycling at our facility is a priority. To learn about all the ways Anne Arundel County makes recycling easy for you, visit

Deale, MD 20751

Hours of Operation:
Monday - Saturday
8:00 am - 4:00 pm

RECYCLING IS OUR PRIORITY

When you visit a Recycling Center, please be prepared to recycle everything you can. To make your visit quick and safe, separate the materials in your load so that you can unload each material at the appropriate location. Attendants are available to answer questions and offer direction to make sure that no recyclable items are thrown into the trash. Follow attendants' instructions to ensure your visit is safe and efficient.

DONATION OVER DISPOSAL

Make the better choice to donate reusable items like clothing and furniture rather than disposing of them. Please visit <http://www.aacounty.org/departments/public-works/waste-management/reduce-reuse/> for a list of resources. Our Recycling Centers also offer textile recycling.

SECURE YOUR LOAD - IT'S THE LAW

When transporting your materials to the Recycling Centers or Landfill, be sure the items you're hauling are secured in the back of your vehicle or trailer. Large, unsecured items can fall off and cause problems when dropped in travel lanes. Smaller, loose items can litter the roads when they fly out from open vehicles.

GOT PAINT?

The best option for your unused paint is to donate it when possible. Unused latex paint is not hazardous, but can leave a sticky mess for employees and equipment. Latex paint is not accepted at the curb, however it can be solidified and then brought to a Recycling Center for proper disposal. If your paint is oil or lead-based, or a solvent, it must be brought to one of our Household Hazardous Waste Events.
