Third Party Footing (210) Certification

Building Permit #: _____ Building Permit Active: Yes Date Issued: _____

Grading Permit #: _____ Phase 1 Certification Passed: Yes Date Passed: _____

Site Address: _____

Permit status, issue date & inspection history can be found here: <https://aca-prod.accela.com/aaco/Default.aspx>

The following is to be completed by the third party certification company/individual. This form and all submitted documents/reports must be signed and performed by the pre-approved inspector.

I, _____, hereby certify that I have reviewed and inspected the footings for the above referenced Building Permit # at the associated property to the applicable Building Codes as adopted under Article 15 of the Anne Arundel County Code and performed the following list of requirements:

- A minimum of 4 test locations (one on each side of the structure, each within 12" of the edge of the footing and at the plane of the footing bearing) of actual soil pressures along the footing line were performed.
- A site drawing showing the interval and location of all test sites is attached.
- The test result (in pounds per square foot) for each test site is attached.
- The method of verification of soils pressure is indicated.
- Footing ground #4 copper wire or #4 rebar is properly placed a minimum of 20' in footing and secured.
- Overall setbacks, dimensions and layout are in accordance with the approved permit documents.
- Dimensions of footings are reviewed and attached.
- Depth of footings below grade are reviewed and attached.
- Silt fence is properly installed.
