Dear Board of Trustees and Members of the
Anne Arundel County Retirement and Pension System

I am pleased to present to you the Anne Arundel County Retirement and Pension System (the "System") Comprehensive Annual Financial Report, for the year ended December 31, 2015. This financial report is a historical perspective of benefits, services, and fiscal activities of the System. The purpose of this report is to provide you, the plan participants and other interested parties, with sufficient information to evaluate the performance of the System during the plan year.

Plan History

County employees participate in four single-employer defined benefit pension plans. The County plans were established under authority created by County Charter and legislation. In December 1996, the County passed legislation creating the Anne Arundel County Retirement and Pension System, a corporation that is an agency in the executive branch of County government, effective February 1, 1997. At that date, all net assets of pension trust funds were transferred to the System. In 2004 the Board of Trustees of the System adopted a formal statement of funding objectives, policy, and strategy. The Statement of Investment Policy and Objectives was designed to clearly communicate the directives of the Trustees of the System to all interested parties. This investment policy applies to the funds of the System on an aggregate basis. The Policy Statement sets forth how each fund manager shall be governed and details specific investment guidelines relating to each of the fund managers.

Major Initiatives

In 2012 an Experience and Assumption Study was conducted by the actuary to review the experience of the Plans during 2007 to 2011. The findings and related assumptions were adopted by the Board effective with the Valuations of January 1, 2013.

Each year the Board reviews the investment asset allocation and prospective returns for the various classes to attempt to construct a portfolio that will produce the desired rate of return. The resulting re-balancing of the portfolio generally requires moving funds among managers and either elimination of current manager or the hiring of new investment managers. In 2015 Private Markets exposure continued to be increased, cash was raised for disbursements, while other allocations remained level.

Funding Status

The overall funded ratios for the Employees' Retirement Plan, the Police Service Retirement Plan, the Fire Service Retirement Plan, and the Detention Officers' and Deputy Sheriffs' Retirement Plan at December 31, 2015 increased to 77.0%, 78.5%, 87.6% and 73.0%, respectively.

Investment Performance

The average investment returns for the Employees' Retirement Plan, the Police Service Retirement Plan, the Fire Service Retirement Plan, and the Detention Officers' and Deputy Sheriffs' Retirement Plan on a market value basis for the year ended December 31, 2015 were -1.5%, -1.7%, -1.3% and -1.7%, respectively. On an actuarial basis, the average investment returns for the Employees' Retirement Plan, the Police Service Retirement Plan, the Fire Service Retirement Plan, and the Detention Officers' and Deputy Sheriffs' Retirement Plan were 5.7%, 5.4%, 5.5, and 5.3%, respectively. The actuarial value of assets is calculated by spreading the market value investment gains or losses in excess of (or below) the assumed rate of return over a five year period. The asset smoothing method was changed with the 2011 valuation.

System Organization and Management

The Board of Trustees is responsible for reviewing the investment program; approving policies, objectives, and guidelines; and reviewing the financial performance of the System in relation to expectations. The Board also appoints the investment committee to make specific recommendations as to asset allocation and investment strategies. The Investment Committee works with an investment consultant (currently New England Pension Consultants) to establish strategies and conduct searches for appropriate investment managers. The Board has final approval for all manager selections and policy changes.

The Board also selects the custodian bank that administers the Plans (currently State Street Bank & Trust), the actuary (Bolton Partners PC), and the independent auditors (CliftonLarsonAllen LLP). The Secretary of the Board of Trustees is responsible for daily administrative decisions and the Anne Arundel County Office of Personnel and Office of Finance carry out these administrative actions, including transmittal of contributions and funding the payment of benefits and other administrative expenses. Additional details regarding investment professionals who provide services to the System are included in the Investment Section later in this report.

Financial Management

The financial statements and supplemental information and schedules included in this report are the responsibility of System management and have been prepared in accordance with accounting principles generally accepted in the United States of America for governmental accounting and reporting as pronounced and adopted by the Governmental Accounting Standards Board. I urge you to read the Management Discussion and Analysis, Basic Financial Statements, and Notes to the Basic Financial Statements to better understand the results of the System during 2015.

Independent Audit

The System is audited annually. For the year ended December 31, 2015, CliftonLarsonAllen LLP, an independent firm of Certified Public Accountants, conducted the audit. Refer to Independent Auditors' Report for the audit opinion.

Internal Accounting Control

Management is responsible for maintaining a system of adequate internal controls designed to provide reasonable assurance that transactions are executed in accordance with management's general or specific authorization, and are recorded as needed to maintain accountability for assets and to permit preparation of the combining financial statements. We believe the internal controls in effect during the year ended December 31, 2015, adequately safeguard the assets and provide reasonable assurance regarding the proper recording of financial transactions.

Acknowledgments

Staff in Anne Arundel County's Office of Finance prepared this financial report of the System. It is intended to provide complete and reliable information as a basis for making management decisions, determining compliance with legal provisions, and as a means of determining responsible stewardship for the assets contributed by the members and their employers. This report is being sent to the Board of Trustees and other interested parties.

Sincerely,

Julie Mussog
Controller

INDEPENDENT AUDITORS' REPORT

The Board of Trustees
Anne Arundel County Retirement and Pension System
Annapolis, Maryland

Report on the Financial Statements

We have audited the accompanying financial statements of Anne Arundel County Retirement and Pension System (the System), a pension trust fund of Anne Arundel County, Maryland, which comprise the combining statement of fiduciary net position as of December 31, 2015 and the related combining statement of changes in fiduciary net position for the year then ended, and the related notes to the financial statements, as listed in the table of contents. The prior year summarized comparative information has been derived from the System's 2014 financial statements and, in our report dated June 9, 2015; we expressed an unmodified opinion on those financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the System's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the System as of December 31, 2015, and the respective changes in its fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedules of changes in net pension liability and related ratios by plan, investment returns, and employer contributions by plan, and notes to required supplementary information, as listed in the table of contents, be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the System's financial statements. The supplementary schedules, including the schedules of administrative expenses, investment expenses, and payments to consultants, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the financial statements.

The supplementary schedules, as listed in the table of contents, are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary schedules, including the schedules of administrative expenses, investment expenses, and payments to consultants, as listed in the table of contents, are fairly stated, in all material respects, in relation to the financial statements as a whole.

The information in the introductory, investment, actuarial and statistical sections, as listed in the table of contents, have not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated June 7, 2016 on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control over financial reporting and compliance.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Board of Trustees
Anne Arundel County Retirement and Pension System
Annapolis, Maryland

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Anne Arundel County Retirement and Pension System (the System), a pension trust fund of Anne Arundel County, Maryland, which comprise the combining statement of fiduciary net position as of December 31, 2015 and the related combining statement of changes in fiduciary net position for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated June 7, 2016.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the System's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, we do not express an opinion on the effectiveness of the System's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the System's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the System's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on

The Board of Trustees
Anne Arundel County Retirement and Pension System

compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the System's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in black ink that reads "CliftonLarsonAllen LLP". The signature is written in a cursive, flowing style.

CliftonLarsonAllen LLP

Baltimore, Maryland
June 7, 2016

To introduce readers of the financial report of the Anne Arundel County Retirement and Pension System (the System), we, as Management, are pleased to provide this discussion and analysis of financial activities for the year ended December 31, 2015. Please read it in conjunction with the rest of the report, which consists of the basic financial statements, including the notes thereto, required supplementary information (RSI), and supplementary schedules. Comparable combined amounts from the year ended December 31, 2014 have been provided herein to enhance comparability.

The System has the fiduciary responsibility to administer four single-employer defined benefit pension plans for certain County employees: the Employees' Retirement Plan, the Police Service Retirement Plan, the Fire Service Retirement Plan and the Detention Officers' and Deputy Sheriffs' Retirement Plan.

Financial Highlights

Total Plan net position decreased \$58.7 million in calendar year 2015 bringing net position to \$1.60 billion. Contributions increased 2.6% to \$79.0 million versus \$77 million in 2014. Of this total, employer contributions of \$66.7 million were 2.1% higher than the 2014 total of \$65.3 million. Participant contributions increased by \$0.6 million to \$12.3 million. The 2015 time weighted total rate of return of -1.6% compares to a gain of 4.7% for 2014.

The System paid \$110.1 million in benefits in 2015, compared with \$103.2 million paid in 2014 an increase of 6.7%. The 2015 Cost of Living Adjustment (COLA) for beneficiaries ranged from 0% for retirees since 1997 and (0.1%) for substantially all retired prior to 1997 and the number of benefit recipients increased 5.6% to 3,188.

Employees' Retirement Plan – In 2015 net position decreased \$19.7 million to \$564.5 million or 3.4%. Benefit payments of \$41.3 million outpaced contributions of \$30.5 by \$10.8 million and various administrative expenses were \$505,852.

Police Service Retirement Plan – In 2015 net position decreased \$16.8 million to \$463.6 million or 3.5%. The Plan's benefit payments of \$31.1 million were \$8.4 million greater than contributions of \$22.7 million. Various administrative expenses were \$427,109.

Fire Service Retirement Plan – In 2015 net position decreased by \$21.6 million to \$468.5 million or 4.4%. Contributions of \$18.2 million lagged the benefit payments of \$31.5 million. Various administrative expenses were \$438,008.

Detention Officers' and Deputy Sheriffs' Retirement Plan. – In 2015 net position decreased by \$0.6 million to \$110.8 million or 0.6%. Contributions were \$7.7 million compared with benefit payments of \$6.3 million, allowing for a proportionately greater increase in net position relative to the other Plans. Various administrative expenses were \$99,084.

Overview of the Basic Financial Statements

In this financial report, the basic financial statements consist of the Combining Statement of Plan Net Position and the Combining Statement of Changes in Plan Net Position with accompanying Notes. The financial statements present information in separate columns for each of the four single-employer defined benefit pension plans as of and for the year ended December 31, 2015 with combined comparative information as of and for the year ended December 31, 2014. The Combined Statement of Plan Net Position presents the financial position of the Plans. The financial position is comprised of assets, primarily consisting of investments; less liabilities, which are amounts owed to settle investment transactions, accounts payable, and securities lending obligations. The difference between assets and liabilities is net position, which represents the amount of resources available to pay future benefits to retirees and their beneficiaries.

Investments net of cash consist of domestic and foreign debt obligations, domestic and foreign equities, real estate, insurance company contracts, absolute return funds, and private markets. The System has a securities lending program to enhance its investment return. The assets and liabilities arising from the program are closely matched, netting to no additional material Plan liability. In accordance with generally accepted accounting principles, the liability for future benefit payments is not reported in these financial statements. Refer to footnote 4 for the Schedule of Net Pension Liability of the System By Plan; which presents an estimate of the liabilities.

The Combining Statement of Changes in Plan Net Position presents the additions to and deductions from the four Plans' net positions during the year. Each Plan receives contributions from participants and the County, as well as income or losses from investments and related activity. The primary deductions are the payment of benefits, which are the Plans' primary objectives. Deductions also include refunds to members who leave the Plans as well as administrative expenses. Administrative expenses are allocated monthly to each Plan based on its relative percentage of the total investments.

Notes to the Basic Financial Statements

The Notes to the Basic Financial Statements are an integral part of the statements. These notes provide background and more detail about the information in the financial statements. Among other matters, the notes describe the System's purpose and its membership; the significant accounting policies used to prepare the basic financial statements; the nature of the four Plans, including the membership and benefit provisions and contribution requirements; the System's investment authority and policies; how investments and related documentation are safeguarded; and selected details about various investment activity and balances.

Required Supplementary Information

The RSI section provides actuarially determined information about the Plans. The section was substantially revised for the 2014 reporting period to comply with the Statement 67, *Financial Reporting for Pension Plans* from the Government Accounting Standards (GASB) Board. The RSI section displays changes for each Plan's Net Pension Liability (NPL) and related ratios, contributions related to payrolls by Plan, and money-weighted investment returns for the System.

Summary and Analysis of Financial Information

The following Condensed Statement of Plan Net Position and Changes in Plan Net Position presents financial information, with dollar amounts in millions for the System comparing 2015 and 2014.

***Condensed Combined Statement of Fiduciary Net Position
As of December 31, 2015 and 2014 (in millions)***

			Change in	Percentage

	<u>100.0%</u>	<u>100.0%</u>	-1.6%	4.7%

The System's funding objective is to meet long-term benefit obligations through contributions and investment income. The funding ratio, which is the actuarial value of assets divided by the actuarial accrued liability, is an estimate of how well the System is meeting that objective. A higher funded ratio indicates that the Plan is better funded. As of December 31, 2015 and 2014 the funded ratios for the System were 79.9% and 78.7%, respectively. Additionally, System fiduciary net position as a percentage of the total pension liability as of December 31, 2015 was 72.9%.

The System paid \$110.1 million in retirement benefits and refunds to 3,188 participants and beneficiaries during 2015, compared to \$103.2 million in 2014 to 3,018 persons. This reflects an average of \$34,555 per person in 2015, compared to an average of \$34,185 in 2014.

The System received \$12.3 million in contributions from 3,942 active participants during 2015. In 2014, \$11.7 million was received from 3,714 active participants. The employer contributions were \$66.7 million in 2015, compared to \$65.3 million in 2014. Employer contributions for the calendar year are based on the appropriate June fiscal year's actuarial recommended contribution, which is divided by 12 and provided to the respective Plans on a monthly basis. The County contributed 100 percent of the 2015 Actuarially Determined Contribution (ADC) for all Plans and has contributed the ADC recommended by the actuary for every year. Administrative costs for 2015 were approximately \$1.5 million for 7,524 participants or an average cost of \$195 per person. The approximately \$1.4 million for 2014 administrative costs for 7,320 participants was \$192 per person.

Overall Analysis of Financial Position

The System reduced its long-term investment assumption from 8% to 7.5% in 2014 which, as a more conservative approach, puts pressure on reducing the Net Pension Liability. Management believes the System is structured to support continued asset growth and stable funding for the future.

Requests for information

The System's Comprehensive Annual Financial Report is available at Anne Arundel County's web page www.aacounty.org/Personnel/Pension/FAQPension.cfm. If you have questions concerning this report or need additional financial information, please contact the Office of Personnel, 2660 Riva Road, Annapolis, Maryland, 21401.

1 Summary of Significant Accounting Policies

The Anne Arundel County Retirement and Pension System (System) administers four defined benefit pension plans – the Employees’ Retirement Plan, the Police Service Retirement Plan, the Fire Service Retirement Plan, and the Detention Officers’ and Deputy Sheriffs’ Retirement Plan (the Plans). Although the assets of the Plans are commingled for investment purposes, each Plan’s assets may be used only for the payment of benefits to the members of that Plan, in accordance with its terms. The System was established as an Agency in the Executive branch of Anne Arundel County, Maryland (the County) and has the powers and privileges of a corporation to the extent permitted by law. The System is reported as Pension Trust Funds in the County’s Comprehensive Annual Financial Report. The Board of Trustees is comprised of representatives from the Executive branch of the County, participating employee groups, and two from outside County government.

A Basis of Presentation - The accounts of the System are organized on the basis of separate pension trust funds for each Plan, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, net position, additions, and deductions. Pension trust funds are accounted for and reported in this manner because capital maintenance is critical.

B Basis of Accounting - The basic financial statements were prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. The County’s contribution to each Plan is recognized when due and the County has made a formal commitment to provide the contribution. Benefits and refunds are recognized when due and payable in accordance with the terms of each Plan. Certain 2014 amounts have been reclassified in conformity with the 2015 presentation. These reclassifications had no effect on plan net position or changes therein.

The accounting and reporting policies conform to accounting principles generally accepted in the United States of America as applicable to government organizations. The preparation of financial statements in conformity with these principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

C Investments - Investments are reported at fair value. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments reflected at fair value. The fair value of real estate investments is based on periodic independent appraisals. Investments that do not have an established market, such as private markets, are reported at estimated fair values. The fair value of private markets are based on management’s valuation of estimates and assumptions from information and representations provided by the respective general partners, in the absence of readily ascertainable market values. There are no investments with parties or in entities related to the County. Fixed income securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings.

D Administrative Expenses - The administrative expenses of the System are charged to the respective Plans on the basis of its percentage ownership in the System’s net position. Expenses are paid either by the County or from a separate cash account held by the custodian. Because of the commingled nature of funds, payments may be from either investment earnings or contributions. The total administrative expenses incurred during the year ended December 31, 2015 were \$1,470,053 of which approximately \$548,900 was initially paid through the County’s Accounts Payable department and subsequently reimbursed to the County by the System. The System is administered by employees within the County’s Office of Personnel and Office of Finance. Some administrative costs are allocated to the Pension Trust Fund; however certain administrative costs are paid by the County’s General Fund.

E Income Taxes - The System qualifies under Section 401(a) of the Internal Revenue Code (IRC) and is exempt from income taxation as allowed by Section 501(a) of the IRC.

F Comparative Financial Information - The financial statements include prior year combined comparative information for the System, but not at the individual Plan level, which is required by generally accepted accounting principles. Accordingly, these financial statements should be read in conjunction with the System's audited financial report from 2014, from which the combined prior year amounts were derived.

G New Pronouncements -- There were no new pronouncements for the reporting period ending December 31, 2015.

2 General Description of the System

A Covered Membership - Membership in each plan consisted of the following as of December 31, 2015, based on the January 1, 2016 actuarial valuation:

	Employees' Retirement Plan	Police Service Retirement Plan	Fire Service Retirement Plan	Detention Officers' and Deputy Sheriffs' Plan	Total
Retirees and beneficiaries receiving payments	1,710	689	550	239	3,188
Terminated Plan members entitled to but not yet receiving payments	276	-	-	8	284
Deferred Retirement Option (DROP)	-	43	59	8	110
Active Plan members	2,186	641	773	342	3,942
Total	4,172	1,373	1,382	597	7,524

B Plan Description, Contribution Information and Vesting - The following description of the System provides only general information. Participants should refer to the most recent Summary Plan Description booklets for a more complete description of the respective Plan's provisions.

Employees' Retirement Plan

Plan Description: The Employees' Retirement Plan is a single-employer defined benefit pension plan that covers all full-time general employees of the County who are not included in any other pension plan, as well as employees of Anne Arundel Economic Development Corporation. The Plan provides retirement, disability, and death benefits to Plan members and their beneficiaries pursuant to two separate benefit structures: Tier I and Tier II. Cost-of-living adjustments (COLAs) are also provided pursuant to County legislation.

Contributions: Contribution rates for participants are established through County legislation. Employees who elect to be in Tier I are required to contribute 4 percent of their annual covered salary. Tier II employees are not required nor permitted to make contributions. The County provided monthly contributions to the Plan based on the actuarially determined contribution for 2015 of \$25,654,839, as determined by the Plan's consulting actuary.

Cliff Vesting: Participants will be fully vested after their fifth year of service. Termination prior to the fifth year will result in the return of all employee contributions, if applicable, plus 4.25 percent interest per annum with no additional benefits available.

Police Service Retirement Plan

Plan Description: The Police Service Retirement Plan is a single-employer defined benefit pension plan that covers the following classes of workers: Police Officer, Police Sergeant, Police Lieutenant, Police Captain, Police Major, Deputy Police Chief, and (by election) the Chief of Police. The Plan provides retirement, disability,

and death benefits to Plan members and their beneficiaries. COLA's are also provided pursuant to County legislation.

Contributions: Contribution rates for participants are established through County legislation. Plan participants are required to contribute 7.25 percent of their annual covered salary. The County provided monthly contributions to the Plan based on the actuarially determined contribution for 2015 of \$19,559,952, as determined by the Plan's consulting actuary.

Normal Retirement: Participants hired on or after February 25, 2002 will be fully vested on the earlier of their attainment of age 50 and completion of their fifth year of service, or their completion of 20 years of service. Participants hired before February 25, 2002 will be fully vested on the earlier of their attainment of age 50 or completion of 20 years of service. Termination prior to attainment of Normal Retirement will result in the return of all employee contributions, if applicable, plus 3 percent interest per annum with no additional benefits available.

Fire Service Retirement Plan

Plan Description: The Fire Service Retirement Plan is a single-employer defined benefit pension plan that covers the following classes of workers: Fire Fighter II, Fire Fighter III, Fire Fighter Cardiac Rescue Technician, Fire Fighter/Emergency Medical Technician-Paramedic, Fire Lieutenant, Fire Captain, Fire Battalion Chief, Fire Division Chief, Fire Deputy Chief, and (by election) the Fire Administrator. The Plan provides retirement, disability, and death benefits to plan members and their beneficiaries. COLA's are also provided pursuant to County legislation.

Contributions: Contribution rates for participants are established through County legislation. Plan participants are required to contribute 7.25 percent of their annual covered salary. The County provided monthly contributions to the Plan based on the actuarially determined contribution for 2015 of \$15,121,808, as determined by the Plan's consulting actuary.

Normal Retirement: Participants who retire on or after July 1, 2002 will be fully vested on the earlier of their attainment of age 50 and completion of their fifth year of service, or their completion of 20 years of service. Participants who retired prior to July 1, 2002 will be fully vested on the earlier of their attainment of age 50 and completion of 5 years of service. Termination prior to attainment of Normal Retirement will result in the return of all employee contributions, if applicable, plus 3 percent interest per annum with no additional benefits available.

Detention Officers' and Deputy Sheriffs' Retirement Plan

Plan Description: The Detention Officers' and Deputy Sheriffs' Retirement Plan is a single-employer defined benefit pension plan that covers the following classes of workers: Detention Officer I, Detention Officer II, Detention Officer III, Correctional Program Specialist I, Correctional Program Specialist II, Criminal Justice Program Supervisor, Security Administrator, Correctional Facility Administrator, Assistant Correctional Facility Administrator, Deputy Sheriff I, Deputy Sheriff II, Deputy Sheriff III, Deputy Sheriff IV, and (by election) the Superintendent of Detention Facilities. The plan provides retirement, disability, and death benefits to Plan members and their beneficiaries. COLA's are also provided pursuant to County legislation.

Contributions: Contribution rates for participants are established through County legislation. Plan participants are required to contribute 6.75 percent of their annual covered salary. The County provided monthly contributions to the Plan based on the actuarially determined contribution for 2015 of \$6,370,760, as determined by the Plan's consulting actuary.

Cliff Vesting: Participants will be fully vested on the attainment of age 50 and completion of their fifth year of service. Termination prior to attainment of Normal Retirement will result in the return of all employee contributions, if applicable, plus 4.25 percent interest per annum with no additional benefits available.

C Legislative Changes for Past Five Years

Bill No. 30-12 increased the pension contribution for non-represented employees in Fire and Police Plans to 7.25% and Detention Officers' Plan to 6.75%.

Bill No. 67-12 increased contributions for Police Lieutenants for consistency.

Bill No. 98-12 amended the definition of Final Average Basic Pay used in the determination of the retirement benefit. Final Average Basic Pay now means the average of the three highest annual basic pays consisting of the participant's annual basic pay on the participant's date of termination and *any* prior annual basic pay on the anniversary date of the date of termination. If a participant's rate of pay was reduced because of an involuntary transfer based on performance or disciplinary grounds, the Final Average Basic Pay will be the average of the three highest annual basic pays as of the date of termination and the last four anniversary dates as of the date of termination.

Bill No. 51-13 limits the ability of the Personnel Officer to recover certain overpayments. In the absence of fraud by a participant, the Personnel Officer or their agents or assigns may not recover an overpayment based on the erroneous past benefit determination caused by a failure to properly apply the Reduction in benefits upon reemployment under § 5-1-203 if the participant made a material change in position, including accepting, resigning or retiring from employment, in reasonable reliance upon an intentional or negligent misrepresentation of the amount of the participant's benefit made to the participant by the personnel officer or an employee or other agent of the personnel officer.

Bill No. 64-13 provides for a sixth year of the Deferred Retirement Option Program (DROP) for members of the Police Service Retirement Plan and certain members of the Fire Service Retirement Plan including Battalion Chiefs, Division Chiefs, Deputy Chiefs and the Fire Chief. No additional interest is earned or credited on the DROP balance during the sixth year of participation in the DROP. The initial term of a DROP participant period continues to be three years. There are no changes to DROP for participants who are employees represented by the International Association of Firefighters Local 1563. The DROP participation period may be extended by no more than two additional one year terms and the DROP participation period may be extended by no more than three additional one year terms for all other participants.

Bill No. 97-13 amends the vesting requirements and eligibility for normal retirement for participants in the Employees' Retirement Plan and some participants in the Detention Officers' and Deputy Sheriffs' Retirement Plan. In addition to changing the vesting and normal retirement requirements, this bill changes when a participant in these plans can receive credit for pre-plan military service credit, purchase service credit and/or become eligible for a non-service connected disability pension.

A participant in the Employees' Retirement Plan hired on or after July 1, 2015 vests in the benefits of the Plan upon completion of actual plan service plus transferred service under § 5-1-302 totaling 10 years. Normal retirement for a participant hired on or after July 1, 2015 is the participant's 60th birthday and completion of actual plan service plus transferred service under §5-1-302 totaling 10 years or the completion of 30 years of credited service.

Category II participants in the Detention Officers' and Deputy Sheriffs' Retirement Plan hired on or after July 1, 2015 vests in the benefits of the plan upon completion of actual plan service plus transferred service totaling 10 years. Normal retirement for participants hired on or after July 1, 2015 is the participant's 50th birthday and the completion of actual plan service plus transferred service under §5-1-302 totaling 10 years.

Bill No. 02-14 amends provisions related to the calculation of death benefits, locating persons entitled to benefits, and other general provisions to comply with IRS plan qualification rules.

3 Deferred Retirement Option Program (DROP)

The Police Service and Fire Service Retirement Plans each offer DROP plans. These programs permit a Plan member to be credited for benefit payments into an individual account within the Plan while continuing to provide services to the employer and to be paid a salary. The terms for both the Police and Fire Service Plans allow accumulation of pension after 20 years of County service. DROP period must be between 3 and 5 years. Members may remain in DROP for a 6th year, but no interest shall be credited to the DROP account in the 6th year. The lump

sum values held by the System pursuant to the DROP programs are \$7,747,692 for the Police Service Plan, \$12,385,896 for the Fire Service Plan and \$102,878 for the newly established Detention Officers' and Deputy Sheriffs' Retirement Plan.

4 Net Pension Liability of the System By Plan

The components of the net pension liability and assumptions for each Plan at December 31, 2015 are displayed below:

	<u>Employees' Retirement Plan</u>	<u>Police Service Retirement Plan</u>	<u>Fire Service Retirement Plan</u>	<u>Detention Officers' and Deputy Sheriffs' Retirement Plan</u>
Total pension liability	\$ 812,569,878	\$ 643,772,887	\$ 580,859,883	\$ 166,990,286
Plan fiduciary net position*	(564,282,661)	(463,225,492)	(468,239,077)	(110,759,983)
Plan net pension liability	<u>\$ 248,287,217</u>	<u>\$ 180,547,395</u>	<u>\$ 112,620,806</u>	<u>\$ 56,230,303</u>
Plan fiduciary net position as a percentage of the total pension liability	69.44%	71.95%	80.61%	66.33%

*Differences in value from Statement of Changes in Fiduciary Net Position are the result of estimates provided to the actuary prior to completion of financials. Management deems the variances to be immaterial.

Actuarial assumptions.

The total pension liability was determined by an actuarial valuation as of December 31, 2014 using the following summarized actuarial assumptions, applied to all periods in the measurement. An experience and assumption study was conducted in 2012 for the period 2007 to 2011. Full descriptions of the actuarial assumptions are available in the January 1, 2014 valuation reports.

Inflation	3.00%	3.00%	3.00%	3.00%
Salary increases	Rates vary by participant age for each Plan.			
Investment rate of return	7.5%, net of pension plan investment expense, including inflation for each Plan.			
Mortality Scale	RP-2000 Blue Collar Mortality tables with generational project by Scale AA for each Plan			
Set forward for post-disability mortality.	9 years	5 years	5 years	5 years

Discount Rate: The calculation of actuarial liabilities for valuation purposes is based on a current estimate of future benefit payments. The calculation includes a computation of the "present value" of those estimated future benefit payments using an assumed discount rate; the higher the discount rate assumption, the lower the estimated liability will be. For purposes of estimating the liabilities (future and accrued) in this report, an assumption was selected based on the expected long-term rate of return on plan investments. Using a lower discount rate assumption, such as a rate based on long-term bond yields, could substantially increase the estimated present value of future and accrued liabilities.

Sensitivity of the net pension liability to changes in the discount rate. The following schedule presents the net pension liability, calculated using the discount rate of 7.5%, as well as what the Plan's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.5%) or 1 percentage point higher (8.5%) than the current rate.

	Employees'	Police Service	Fire Service	Detention Officers'
	<u>Retirement Plan</u>	<u>Retirement Plan</u>	<u>Retirement Plan</u>	<u>and Deputy Sheriffs'</u>
				<u>Retirement Plan</u>
1% Decrease to 6.5%	\$ 341,266,312	\$ 264,271,466	\$ 188,098,432	\$ 76,814,405
Current Discount Rate 7.5%	\$ 248,287,217	\$ 180,547,395	\$ 112,620,806	\$ 56,230,303
1% Increase to 8.5%	\$ 169,744,307	\$ 112,217,441	\$ 50,936,581	\$ 39,158,592

Long Term Expected Returns. For investment purposes the four Plans which comprise the System are managed on a co-mingled basis. Therefore, the long-term expected rates of investment return are the same for each Plan. The long-term (30 year) expected rate of return on pension System investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by using an optimizer program that relies on the arithmetic return inputs, the standard deviation forecast (risk) for each asset class, and the correlations among them. The result is a 30-year nominal, geometric, net-of-fee return forecast for the pension assets. The 30-year real rate of return is calculated by netting the inflation assumption out of the nominal forecast. The nominal and real rates of return forecasts for each major asset class included in the pension System's target asset allocation of December 31, 2015 (see the discussion of the System's investment policy) are summarized in the following table:

<u>Asset Class</u>	30-Year Geometric Forecast	30-Year Geometric Forecast
	<u>(Nominal Returns)</u>	<u>(Real Returns)</u>
Cash	3.25%	0.00%
U.S. Treasuries	3.50%	0.25%
IG Corp Credit	4.75%	1.50%
Mortgage Backed Securities	3.75%	0.50%

5 Risks and Uncertainties

The System may invest in various types of investment securities. Investment securities are exposed to various risks, such as interest rate, market, and credit risk. Due to the level of risk associated with certain investment securities, it is possible that changes in the values of investment securities may occur in the near term and that such changes could materially affect the amounts reported in the Statement of Fiduciary Net Position.

6 Investments

A General Investment Policy -The System operates under the "Prudent Person" rule used herein, meaning that in investing, the governing authorities of the systems, funds and plans, shall exercise the judgment and care under the circumstances then prevailing, that an institutional investor of ordinary prudence, discretion, and intelligence exercises in the management of investments entrusted to it, not in regard to speculation, but in regard to the permanent disposition of funds, considering probable safety of capital as well as probable income. Investments are made in full accordance with any and all applicable Maryland statutes, as well as any other applicable legislation or regulation, state, federal or otherwise. The roles and responsibilities of the Board of Trustees, the Investment

Committee, the Investment Consultant, the Investment Managers and the Custodian are clearly defined. The Board has established a diversified portfolio to meet the System's return requirements. The table below summarizes the target asset allocation

Asset Class	Market Target (%)	Minimum Exposure (%)	Maximum Exposure (%)
Domestic Equity	23	13	33
International Equity	15	7	25
Emerging Market Equity	7	0	12
Domestic Fixed Income	15	5	25
Emerging Market Debt	5	0	10
Private Markets	9	0	17
Opportunistic Investments	3	0	8
Real Estate	5	0	10
Risk Parity (GAA)	16	11	21
Cash	2	0	10

B Investments Authorized - The System is authorized to invest in U.S. Government securities, insurance company general accounts, commercial paper, money market mutual funds, corporate bonds, common and international stocks, limited partnerships, absolute return funds, private equity, mortgage participation's and real estate. State statutes do not prohibit the System from participating in securities lending transactions. (See Note 7 to the basic financial statements for additional information concerning the System's security lending transactions.)

C Custodial Credit Risk, Deposits - Custodial credit risk for deposits is the risk that the System will not be able to recover its deposits, in the event of the failure of a depository financial institution or will not be able to recover collateral securities that are in the possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the System, and are held by either a counterparty or the counterparty's trust department or agent but not in the System's name. As of December 31, 2015 there were no investments that met this criteria.

D Concentration Risk - Concentration risk is the risk of loss to the System attributed to the magnitude of the System's investment in a single issuer. As of December 31, 2015 there was no exposure to a single issuer greater than 5.0% of the plan net position excluding investment pools. The System's Investment Policy Statement sets maximum concentration limits by asset type and style.

E. Rate of Return - For the year ended December 31, 2015, the annual money-weighted rate of return on pension system investments, net of System expenses, was -1.8%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

F Interest Rate Risk - Interest rate risk is the risk that changes in interest rates will adversely affect the value of an investment. The fair value of fixed income (debt) securities is affected by increases and declines in interest rates. These investments may also have embedded call features allowing the issuer to redeem part or all of the issue prior to maturity at a pre-set price. In addition, debt issues may have interest rates that vary according to a pre-determined external index (such as the London Inter-Bank Offered Rate) or a pre-determined step-up in the interest rate at a pre-determined date(s). The IPS sets limits on floating rates for mortgage backed securities and establishes limits on the average duration of some investment types.

The following table uses the *Segmented Time Distribution* method to display the System's debt holdings by maturity term and investment type. Some issues within the categories agencies/instrumentalities, corporate bonds, collateralized mortgage obligations, and other asset-backed securities have variable rate features. The total fair value of these securities was \$17,517,418.22 as of December 31, 2015.

<u>Investment Type</u>	<u>Fair Value</u>	<u>Investment Maturities (in Years)</u>			
		<u>Less than</u>	<u>1 to 5</u>	<u>6 to 10</u>	<u>over 10</u>
		<u>1 year</u>			
U.S. Treasuries	\$ 11,285,200	\$ -	\$ 2,325,150	\$ 2,949,367	\$ 6,010,683
Agency/Instrumentalities	15,210,297	3,999,960	325,861	-	10,884,476
Corporate Bonds	58,301,884	528,281	18,269,906	30,475,084	9,028,613
Bond Mutual Funds	143,178,237	-	143,178,237	-	-
Collateralized Mrtg Obligations	7,273,527	-	20,553	979,864	6,273,110
Other Asset-Backed Securities	3,687,498	-	309,304	120,708	3,257,486
Foreign and Yankee Bonds	<u>7,680,448</u>	<u>186,517</u>	<u>1,381,061</u>	<u>4,547,111</u>	<u>1,565,759</u>
Totals	\$ 246,617,091	\$ 4,714,758	\$ 165,810,072	\$ 39,072,134	\$ 37,020,127

The segmented time distribution table includes issues with call features and assumes that these issues will be held to maturity. The total fair market value of callable securities totals \$50,267,680 with call dates ranging from January 1, 2016, for continuously callable issues, to September 1, 2045. Stated call prices are generally at par. The callable holdings include issues with floating interest rates which have a market value of \$8,568,240.

G Credit Risk - Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the System. Debt securities are rated by Nationally Recognized Statistical Rating Organizations to provide purchasers with an opinion of the capability and willingness of a borrower to re-pay its debt. The following table displays the System's debt holdings and quality ratings from Standard & Poor's. The Investment Policy Statement provides guidelines to all fixed income managers related to allowable quality ratings.

	<u>Total Fair Value</u>	<u>Standard & Poor's Credit Ratings</u>				
		<u>AAA - A</u>	<u>BBB - B</u>	<u>CCC - C</u>	<u>D</u>	<u>NR</u>

Total Credit Risk of Debt Securities	\$ 298,780,690	<u>\$12,414,729</u>	<u>\$ 58,147,798</u>	<u>\$ 4,479,946</u>	<u>\$ 953,872</u>	<u>\$ 222,784,345</u>
US Gov't & Agencies *	<u>11,285,200</u>					
Total Debt Securities	<u>\$ 310,065,890</u>					

* US government agency securities explicitly guaranteed by the US government are categorized here.

H Foreign Currency Risk - The investment policy recognizes the value of global diversification. A maximum of 46% in international/global exposure is allowed. The System retains six managers for global and international

equity and fixed income exposure. These managers may also purchase or sell currency on a spot basis and may enter into forward exchange contracts on currency provided that the use of such contracts is designed to dampen portfolio volatility or to facilitate the settlement of securities transactions.

There is potential risk with exposure to foreign currency relating to potential unfavorable fluctuation of exchange rates compared with the U.S. Dollar. The System's direct exposure to foreign currency was zero as of December 31, 2015. International/global equities and fixed income assets totaled \$654,368,090 in fair market value, managed in pooled funds as of December 31, 2015.

7 Securities Lending

The Board of Trustees authorizes the System to lend securities held by the custodian, State Street Bank and Trust Company, to broker-dealers and other entities with a simultaneous agreement to return the collateral for the same securities in the future. The System's custodian lends securities, of the type on loan at year-end, for collateral in the form of cash or other securities of 102 percent for domestic securities and 105 percent for international. Cash collateral received by the System with respect to these transactions is invested at the direction of the Board of Trustees in the State Street Bank and Trust Company Quality Funds for Short-Term Investment (STIF), a pooled investment vehicle. Government Accounting Standards Board Statement No. 31 requires disclosure of certain information in connection with the STIF investments which is provided below.

The fair value of the investments held by the STIF is based upon valuation provided by a recognized pricing service. Because the STIF does not meet the requirements of Rule 2a-7 of the Investment Company Act of 1940, State Street Bank and Trust Company has valued the STIF investments at fair value for reporting purposes. The STIF is not registered with the Securities and Exchange Commission. State Street Bank and Trust Company, and consequently the investment vehicle it sponsors (including the STIF) are subject to the oversight of the Federal Reserve Board and the Massachusetts Commissioner of Banks. The fair value of the System's position in the STIF is not the same as the value of the STIF shares. There was no involuntary participation in an external investment pool by the System for the year ended December 31, 2015. No income from one STIF was assigned to another STIF by State Street Bank and Trust Company during the year ended December 31, 2015.

At year-end, the System had no credit risk exposure to borrowers because the amount of collateral held by the System was greater than the value of securities on loan. The market value of invested cash collateral held as of December 31, 2015 was \$105,416,515. There were no securities held as collateral. The market value of securities on loan for the System as of December 31, 2015 was \$101,262,395.

The System did not impose any restrictions during the year on the amount of the loans that the custodian made on its behalf. Moreover, there were no losses during the year resulting from a default of the borrowers or custodian.

All security loans can be terminated on demand by either the System or the borrower, although the average term of the loans is generally one week. Cash collateral received was invested, together with the cash collateral of other qualified tax-exempt plan lenders, in the STIF, a pooled investment vehicle. As of December 31, 2015, the STIF had an average duration of 25 days and a weighted average maturity of 74 days. The System's ownership of the STIF was \$73,308,444 which was equal to the cash collateral on deposit. The relationship between the maturities of the STIF and the System's loans is affected by the maturities of the security loans made by other entities that use the agent's pool, which the System cannot determine. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral. The System cannot pledge or sell collateral securities received unless the borrower defaults.

8 Financial Instruments With Off-Balance Sheet Risk

Mortgage-Backed Securities - A mortgage-backed security depends on the underlying pool of mortgage loans to provide the cash flow to make principal and interest payments on the security. A decline in interest rates can result in prepayments, which reduce the fair value of the security. If homeowners pay on mortgages longer than anticipated, the cash flows are greater and the return on investment would be higher than anticipated. A collateralized mortgage obligation (CMO) is a mortgage-backed security that is comprised of classes or tranches of

bonds. Each class is structured to achieve a specific level of cash flow based on the prepayment assumptions assigned to the underlying mortgage pool.

The System invests in mortgage-backed securities to enhance fixed income returns. Mortgage-backed securities are subject to credit risk, the risk that the borrowers will be unable to meet their obligations. These securities are also subject to prepayment risk, which is the risk that a payment will be made in excess of the regularly scheduled principal payment. Prepayment risk is comprised of two risks: call risk, (the risk that prepayments will occur when interest rates have declined), and extension risk, (the risk that prepayments will not be made when interest rates have increased.) As of December 31, 2015, the fair value of government mortgage-backed securities was \$10,884,476, asset-backed securities was \$3,687,498, and CMO's was \$7,273,527. These are included in the corporate obligations total on the Statement of Net Plan Position.

9 Exposure to Derivatives

Derivative instruments are securities that derive value from another asset and are in the form of a contract between two or more parties. Common derivatives are futures contracts, forwards contracts, options, and swaps. The System has no direct exposure to derivative securities. There are, however, mutual funds, commingled funds, and other investment vehicles in which the System has a percentage ownership that have exposure to futures, currency forward contracts, commodity forward contracts, and total return swap contracts. These funds enter into derivative contracts as part of their investment strategies to mitigate risk and volatility.

A derivative policy statement is included in the Investment Policy Statement (IPS). Prohibited instruments include options, commodities, uncovered options or futures, uncovered short positions, short selling, and use of financial leverage. The derivative exposure as of December 31, 2015 within the mutual funds, commingled funds, and other investment vehicles is comprised of allowable instruments based on the IPS.

10 Contingencies

Certain legal proceedings are pending against the System arising from its normal activities that, based on the facts presently available and the advice of legal counsel, management believes will not have a material adverse effect on the System's financial condition upon settlement.

11 Commitments

The System has committed to fund various private equity investments totaling \$225 million at December 31, 2015, of which approximately \$93.5 remains unfunded. The expected funding dates for these commitments extend through 2020.

12 Subsequent Events

The system evaluated subsequent events through June 7, 2016, the date the financial statements were available to be issued. Events or transactions occurring after December 31, 2015, but prior to June 7, 2016 that provided additional evidence about conditions that existed at December 31, 2015, have been recognized in the financial statements for the year ended December 31, 2015. Events or transactions that provided evidence about conditions that did not exist at December 31, 2015, but arose before the financial statements were available to be issued have not been recognized in the financial statements for the year ended December 31, 2015.

Notes to Schedule

Valuation Date:

Note: "Covered-employee payroll" for 2014 has been changed to reflect the new GASB language.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Projected Unit Credit
Amortization method	Level percentage of payroll, closed, increasing 3.0% per year.
Remaining amortization period	19 to 28 years with an average effective period of 25 years. Starting with new bases in 2014, assumption changes and gains and losses are amortized over 20 years and plan changes are amortized over the average future service of the active population at the time of the change.
Asset valuation method	5-year smoothed market
Inflation	3.00%
Salary increases	Graded schedule begins for age 20 at 6.5% and move to 3.5% at age 55.
Investment rate of return	7.50% net of pension plan investment expense, including inflation, effective 1/1/2014.
Retirement age	Rates vary by participant age and service.
Mortality	Healthy: RP-2000 Blue Collar Mortality Table for males and females projected generationally using scale AA. Disabled: RP-2000 Blue Collar Mortality Table for males and females set forward nine years and then projected generationally using scale AA.

1 **Changes in Actuarial Methods and Assumptions**

Effective with the valuation for 2010, the method of asset valuation has been changed to reflect the actual beginning market value rather than the beginning actuarial value. As of the 2013 valuation, various mortality tables have been updated based on the System's 2012 experience study effective for the FY2014 plan contributions.

The actuarial valuations for the 2013 data are based on a reduced inflation assumption from 3.5% to 3.0%. This in turn changed assumptions for investment return (discount rate), salary growth, total payroll growth, and retiree COLA's. Most of these changes were offsetting but there is a net increase in the liabilities and the County's contribution because the drop in the investment assumption from 8.0% to 7.5% was more significant than the other changes. The amortization period for gains and losses and assumption changes was also reduced from 30 to 20 years.

2 **Significant Legislative Changes 2012 to 2015**

Legislative changes are listed in the General Description of the System in the Notes to the Basic Financial Statements.

The following is a review of investment activity of the System with discussion and comparisons to general investment market trends. NEPC, LLC (NEPC), the Investment Advisor, prepared this review using information provided by State Street Bank, the Custodian Bank.

Calendar year 2015 was the seventeenth consecutive year the System's investment portfolio has been overseen by the Board of Trustees. NEPC continues to act as the System's pension and investment consultant. In 2015, the System added private equity strategies from Warburg Pincus and Private Advisors.

Market Commentary

2015 was marked by uncertainty surrounding certain globally significant economic trends in transition: the extension of the US economic cycle, the path of the Federal Reserve's monetary policy tightening, and the extent of the economic slowdown in China. This uncertainty rattled investors, culminating in risk aversion and contributing to a sharp decline in global markets in August.

At this point last year, we emphasized moderation, be it in tempering expectations for future investment returns or curtailing the urge to replicate outsized returns with a portfolio of the past. We voiced caution amid expectations that global divergences were likely to highlight stresses in financial markets, ultimately pushing volatility higher off cyclical lows. These trends largely flowed through to asset returns in 2015, producing erratic results for investor portfolios. The S&P 500 was up 1.4% and the Barclays Aggregate Index rose 0.5%, while small-cap equities and high-yield bonds were off nearly 4.5%. Global markets wobbled under the strain of a strong US dollar as the MSCI EAFE Index declined 0.8%, emerging markets equities and local debt were down nearly 15%, and commodities plunged.

Global Equity Markets

In the first quarter, small-cap equities benefitted from their largely domestic focus while a stronger dollar took a bite out of large-cap stocks. Monetary accommodation and increasing optimism in Japan led to gains of 5% for the EAFE Index during the quarter, outpacing domestic and emerging markets. Emerging markets returned 2.2% in the first quarter, bolstered by gains in India and Russia. Other commodity-driven markets, such as Brazil, lagged on the back of continued pressure on energy prices.

Global equities had a modest second quarter on the heels of a strong first quarter. After clocking gains of 7.7% in April, emerging markets equities sold off significantly in May and June. Similarly, international developed markets

posted robust returns in April but gave up gains in June. In the US, small cap stocks continued to trump large-cap equities and growth has outpaced value across the capitalization spectrum.

Amid fears of a pending rate hike by the Fed and negative headlines from China and Greece, international equities contracted sharply in the third quarter. Greece and Brazil were among the hardest hit emerging economies, trading down 35% and 33%, respectively. Emerging market small-cap stocks continued to outpace their larger-cap peers. At home, equities suffered their worst quarterly loss in four years. Within large-cap stocks, growth bested value, while value stocks lost less in the small-cap space. Overall, energy and healthcare were among the worst performing sectors.

US equities ended a volatile 2015 on a strong note. Despite a solid last quarter, the year saw the lowest gains for the S&P 500 since 2008 and for the Russell 2000 since 2011. Earlier in the quarter, equities rallied amid robust corporate earnings and macroeconomic data. Subsequently, stocks faltered amid plunging oil prices and concerns around the impact of a stronger US dollar as the Fed tightens monetary policy. The consumer discretionary sector led performance in large caps in 2015 while healthcare dominated small caps; energy was the worst performing sector in both. Growth bested value in large and small equities. Meanwhile, developed markets recouped a portion of their third quarter losses.

Equity Index Returns as of 12/31/2015

MSCI Far East	8.7%	6.7%	8.6%	4.1%

Global Fixed Income Markets

Global sovereign debt gained in the first quarter as yields fell amid declining inflation and accommodative monetary policies. The ECB's €1 trillion government bond-buying program pushed yields in the Eurozone to record lows, while US Treasury yields also declined on renewed expectations of a delayed Fed rate hike. Local-currency emerging market bonds were down 4% in the first quarter due to strength in the US dollar.

Reversing course from a strong first quarter, most fixed-income securities were in the red for the three months ended June 30. Eurozone bonds gave back gains from the first quarter as Greece's debt crisis rattled investors. The Federal Reserve hinted that barring any economic setbacks, the first rate increase would be slated for the later part of the year. Given this expected hike and a pickup in economic activity during the second quarter, the US yield curve experienced a bear-steepening, which occurs when long-term rates rise faster than short-term rates. Higher-yielding and shorter-duration securities were able to hold on to and, in some instances, even add to their gains from the first quarter. Despite strong earnings and credit fundamentals, the overall performance of US high-grade corporate bonds was hindered by record new issuance, which contributed to 16 basis points of spread widening in the quarter. External and local currency emerging market debt lost ground in the second quarter as yields increased globally.

In general, the debt of exporters of oil and commodities underperformed during the third quarter. Brazilian debt was also sharply lower, rocked by a ratings downgrade by Standard & Poor's Ratings Services, and continued economic weakness. Within the US, Treasuries and other high-grade assets rallied as lower-quality securities sold off amid the market volatility. Outside the US, developed market bonds rallied as investors shunned risk. Weakening currencies continued to be the principal drag on emerging market debt. Consequently, debt denominated in local currency declined the most.

At home, the Fed's well telegraphed rate hike drove government yields higher in the fourth quarter, resulting in losses for Treasuries with maturities of less than one year. Within corporate credit, the precipitous selloff in commodity-related sectors was unrelenting. Consequently, high-yield debt was the worst performer during the quarter and in 2015. Investment-grade credit spreads widened 34 basis points over the course of 2015 due to global growth concerns, falling commodity prices, and record issuance of \$1.3 trillion which hampered liquidity. Abroad, emerging market debt remained hindered by a strengthening US dollar, and weakening currencies drove losses in developed markets.

Growth of Assets and Asset Allocation

As of December 31, 2015, the System's net assets stood at \$1.6 billion, down slightly from where assets were at the end of 2014. During the past year, the System experienced a net \$49.8 million in cash outflows, and losses on investment of \$9.16 million. At December 31, 2015, the System's assets were in compliance with Policy and were allocated based on Manager mandate as follows:

12/31/2015 Asset Allocation by Manager Type

Investment Performance

For the year ending December 31, 2015, the System returned -1.6%. Over the 3-year time period, the System averaged a 4.3% return, while the System's 5-year return was 5.4%. All performance returns are net of fees and are calculated using the time-weighted rate of return method.

The following table summarizes investment holdings as of December 31, 2015, displaying fair market value and percent of the total value compared with the prior year data.

Investment Objectives

The Trustees of the Anne Arundel County Retirement System (System) seek to maintain the annual rate of pension contributions based on accepted actuarial practices, at a stable or declining percent of payroll. The Trustees also seek to maintain the funded ratio (market value of assets/actuarial value of benefits earned to date as measured by the Accrual Benefit Obligation) at a target level of 115% and in no event less than 100% in any given year. The System must remain capable of paying all benefits earned by employees. This principle is paramount and will not be compromised. Prudence is thus a mandatory factor in all decisions relating to the System. The disposition of the System's assets shall be made solely in the interest of the participants and their beneficiaries of the pension plan for exclusive purposes of providing benefits to such participants and their beneficiaries. Investments shall be made in a cost efficient manner, and reflect current industry best practices. The System return requirements are articulated in three separate ways:

- **Nominal Returns** – The actuarially required rate of return for the Fund is 7.5% annually, net of all fees and operating expenses. In order to achieve a buffer and have a somewhat higher likelihood of achieving the Fund's objective, the Board desires a net total return in excess of this 7.5% target.
- **Real Returns** – The Board is aware the preservation of purchasing power is driven by inflation. As the Consumer Price Index (CPI) is the most commonly accepted measure of inflation, The Board has defined its real rate of return target as the nominal return less CPI. With an actuarially assumed return rate of 7.5% (long-term) and an actuarially assumed CPI rate of 2.75% (long-term), the long-term, real return target is set at 4.75%.
- **Relative Returns** – Total return shall rank in the top half of the appropriate public fund universe. Risk-adjusted returns should also rank in the top half of the same universe. Returns for investment managers shall exceed their respective benchmarks, as well as rank in the top half of the appropriate universe of managers adhering to the same investment strategy.

The Board further recognizes that the return targets described herein may not be achieved in any single year. Instead, a longer-term horizon of 5-7 years shall be used in measuring the long-term success of the Fund. While the Board expects that returns will vary over time, the Fund shall have a risk tolerance consistent with that of other funds created for similar purposes, and the assets of the Fund shall be invested accordingly.

General Investment Policy

The System operates under the "Prudent Person" rule used herein, meaning that in investing, the governing authorities of the systems, funds and plans, shall exercise the judgment and care under the circumstances then prevailing, that an institutional investor of ordinary prudence, discretion, and intelligence exercises in the management of investments entrusted to it, not in regard to speculation, but in regard to the permanent disposition of funds, considering probable safety of capital as well as probable income.

Investments are made in full accordance with any and all applicable Maryland statutes, as well as any other applicable legislation or regulation, state, federal or otherwise. The roles and responsibilities of the Board of Trustees, the Investment Committee, the Investment Consultant, the Investment Managers and the Custodian are clearly defined. The Board has established a diversified portfolio to meet the System's return requirements. The table below summarizes the target asset allocation.

Asset Class	Market Target (%)	Minimum Exposure (%)	Maximum Exposure (%)
Domestic Equity	23	13	33
International Equity	15	7	25
Emerging Market Equity	7	0	12
Domestic Fixed Income	15	5	25
Emerging Market Debt	5	0	10
Private Markets	9	0	17
Opportunistic Investments	3	0	8
Real Estate	5	0	10
Global Asset Allocation (GAA)	16	11	21
Cash	2	0	10

The Chair of the Investment Committee reviews the asset allocation at least on a quarterly basis to determine if the asset allocation is consistent with the exposure ranges described herein. The Chair of the Investment Committee directs investment managers to transfer funds to rebalance the asset allocation as necessary with subsequent Board notification. The System shall strive to maintain a neutral bias with respect to Style Allocation (Growth versus Value) in its equity investments. As part of the normal rebalancing responsibilities, The Chair of the Investment Committee shall use appropriate judgment and care when rebalancing portfolios. Market conditions and transaction costs are considered.

For each separate account, investment managers must comply with the quality and diversification requirements stated in the investment policy. Investment managers have detailed reporting requirements and must certify policy compliance on a quarterly basis. Permissible derivative uses are hedging, creation of permitted market exposures, and management of country and asset allocation exposure.

Proxy Voting

The Board of Trustees delegates proxy voting responsibility to its investment managers. Investment managers are required to report to the Board on an annual basis, summarizing proxy voting over the previous fiscal year. The report must detail any changes that have occurred in the manager's proxy voting policies and note any instances where proxies were not voted in accordance with the best interest of the System's beneficiaries.

Investment Manager Fees

The following table presents investments managers' fees paid by asset class.

<u>Asset Class</u>	<u>Assets Managed (Includes Cash)</u>	<u>Fees Paid</u>
Domestic equity	\$ 451,975,589	\$ 2,256,656
International equity	333,800,444	583,820
Domestic fixed income	112,314,407	502,836

Total Investment Managers' Fees		10,995,870
Other Investment Service Fees:		
Custodial fees		375,325
Total Investment Expenses		\$ 11,371,195

*Fees net to fund assets. Not available as discrete amounts.

** Fees reported for a portion, but not all of private market accounts.

Brokerage Commissions

Broker's commissions on investment transactions, excluding mutual funds, for the year ended December 31, 2015 totaled \$277,991. Brokerage firms receiving more than \$6,000 in fees are listed below.

<u>Brokerage Firms</u>	<u>Fees Paid</u>	<u>Brokerage Firms</u>	<u>Fees Paid</u>
Liquidnet, Inc.	\$ 41,360	Credit Suisse Securities	\$ 8,264
Goldman Sachs & Co.	38,296	Keybank Capital Markets	8,036
J.P. Morgan Securities	16,804	Citigroup Global Markets	7,986
Instinet	12,333	Deutsche Bank Securities Inc.	7,443
Boenning & Scattergood Inc	10,023	RBC Capital Markets	7,081
Morgan Stanley Co. Inc.	9,578	Barclays Capital	6,166
			\$ 173,370

The Investment Policy Statement requires that each manager shall provide an annual commission report to the Investment Committee and Investment Consultant within forty-five (45) days of the end of each calendar year. The report shall cover all trades executed during the prior year and should include a discussion of the firm's policy for selecting brokers, reviewing brokers, and negotiating brokerage commissions. This should include identification of any situations where the investment manager has a financial interest in brokers used to execute trades in the portfolio as well as a list of all broker-dealers used by the firm. Actual commission expenses are to be compared to the prior year. If the firm has a system for monitoring total transaction costs (commissions plus market impact), a copy of this analysis should be provided. If no such system is being used, the commission report should include a complete explanation of how the firm monitors selected brokers for best execution.

Anne Arundel County Retirement and Pension System
Investment Managers Guidelines and Exemptions as of December 31, 2015

Note A: 1. May hold up to 5% of the portfolio, at market value, in Senior Bank Loan Debt securities.

Note B: 1. May hold up to 10% of their portfolio in any one security.

2. May hold up to 30% of the portfolio in American Depository Receipts (ADRs), which are stocks or convertibles of foreign companies that are publicly traded in the US.

3. Is exempt from being required to hold at least 25 stocks in their portfolio.

4. For securities held in the Anne Arundel County Pension and Retirement System portfolio, Southeastern may own up to 20% of the outstanding market capitalization of a given company across all of their portfolios. If Southeastern owns more than this 20% limit for any security within the Anne Arundel County Pension and Retirement System portfolio, the Investment Committee Chairman and Investment Consultant of the Anne Arundel County Pension and Retirement System must be notified immediately for approval to continue holding the security, which may or may not be granted, depending on prevailing conditions.

5. May hold up to 20% of the portfolio in cash and equivalents if market conditions warrant, but Board must be notified if cash goes above 20%.

Note C: 1. Exempt from receiving at least two competitive offers on the same or similar securities prior to purchasing new issue mortgage back securities.

2. Permitted to invest in the securities referenced in Section A of the Anne Arundel County Retirement and Pension System Investment Policy Statement. In addition, Western Asset may hold investments in High yield Fixed Income, Emerging Market Debt, Emerging Market Debt Local Currency, and/or Bank Loans.

Anne Arundel County Retirement and Pension System
Statement from the Actuary
December 31, 2015

Board of Trustees
Anne Arundel County Retirement and Pension System
Annapolis, Maryland

Dear Members of the Board of Trustees

We prepared annual actuarial valuations as of January 1, 2016 for the Anne Arundel County Retirement and Pension System. The system consists of the following plans, each of which is valued separately:

- Employees' Retirement Plan
- Police Service Retirement Plan
- Fire Service Retirement Plan
- Detention Officers' and Deputy Sheriffs' Retirement Plan

The contributions determined in these valuations are for the Fiscal year ending June 30, 2017. The valuations are based on employee and financial data, which were provided by the County Office of Personnel and County Office of Finance, respectively. We have performed limited tests for consistency and reasonableness and have not found any material problems with the data.

The following GASB68 information is provided as of the December 31, 2015 measurement date for FYE2016. This will require that the actual County contributions for the second half of FY16 (i.e. contributions made after the measurement date) to be treated as a deferred outflow (when the amount is known), but this will not affect the Total Pension Expense recognized for FY16. The methods, assumptions, and participant data as of December 31, 2015 used for these calculations are summarized in the relevant sections of this report. The GASB68 information was prepared using the Entry Age Normal actuarial cost method with Normal Cost ending at DROP entry date.

Methodology, Reliance and Certification

This report is prepared for the County. The report contains the actuarial information to be included with the County's financial statements for the year end June 30, 2016 (the County's fiscal year end date) as required by GASB68. This information has been prepared for use in the financial statements of the County. This information is not intended for, nor should it be used for, any additional purposes.

All costs, liabilities and other factors under the Plans were determined in accordance with generally accepted actuarial principles and procedures. The funding method used in the actuarial valuations is the projected unit credit cost method. The objective of this funding method is to produce level contributions as a percentage of payroll as long as the average age of the population does not change. The funding objective of the System is to meet long-term benefit promises through contributions and investment income. The funding ratio, which is the actuarial value of assets divided by the actuarial accrued liability, is an estimate of how well the System is meeting the objective. The ratio for all four plans decreased from the prior year.

The included calculations assume that the members and the County will continue to make all required actuarially determined contributions. Based on that assumption, the plan's fiduciary net position is expected to be available to make all future benefit payments of current plan members.

These calculations and comparisons with assets are applicable for the valuation date only. The future is uncertain, and the plan may become better funded or more poorly funded in the future. This valuation does not provide any guarantee that the plan will be able to provide the promised benefits in the future.

Methodology, Reliance and Certification (cont.)

This is a deterministic valuation in that it is based on a single set of assumptions. This set of assumptions is one possible basis for our calculations. Other assumptions may be equally valid. The future is uncertain and the plan's actual experience will differ from those assumptions; these differences may be significant or material because these results are very sensitive to the assumptions made and, in some cases, to the interaction between the assumptions. We may consider that some factors are not material to the valuation of the plan and may not provide a specific assumption for those factors. We may have used other assumptions in the past. We will likely consider changes in assumptions at a future date.

The County is responsible for selecting the plan's funding policy, actuarial valuation methods, asset valuation methods, and assumptions. The policies, methods and assumptions used in this valuation are those that have been so prescribed and are described in this report. The County is solely responsible for communicating to Bolton Partners, Inc. any changes required thereto.

The County could reasonably ask how the valuation would change if we used a different assumption set or if plan experience exhibited variations from our assumptions. This report does not contain such an analysis. This type of analysis would be a separate assignment.

The cost of this plan is determined by the benefits promised by the plan, the plan's participant population, the investment experience of the plan and many other factors. An actuarial valuation is a budgeting tool for the County or in this case a measure of accounting expense. It does not affect the cost of the plan. As the experience of the plan evolves, it is normal for the level of contributions and expense to the plan to change. If a contribution is not made for a particular year, either by deliberate choice or because of an error in a calculation, that contribution can be made in later years. We will not be responsible for contributions that are made at a future time rather than an earlier time. The plan sponsor is responsible for funding the cost of the plan.

We make every effort to ensure that our calculations are accurately performed. These calculations are complex. Despite our best efforts, we may make a mistake. We reserve the right to correct any potential errors by amending the results of this report or by including the corrections in a future valuation report.

Because modeling all aspects of a situation is not possible or practical, we may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. We may also exclude factors or data that are immaterial in our judgment. Use of such simplifying techniques does not, in our judgment, affect the reasonableness of valuation results for the plan.

This report is based on plan provisions, census data, and asset data submitted by the County. We have relied on this information for purposes of preparing this report, but have not performed an audit. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information. The plan sponsor is solely responsible for the validity and completeness of this information.

The County is solely responsible for selecting the plan's investment policies, asset allocations and individual investments. Bolton Partners, Inc.'s actuaries have not provided any investment advice to the County.

The information in this report was prepared for the internal use of the County, the plan and their auditors in connection with our actuarial valuations of the pension plan as required by GASB68. This report may not be used for any other purpose; Bolton Partners, Inc. is not responsible for the consequences of any unauthorized use or the reliance on this information by any other party.

The calculation of actuarial liabilities for valuation purposes is based on a current estimate of future benefit payments. The calculation includes a computation of the "present value" of those estimated future benefit payments using an assumed discount rate; the higher the discount rate assumption, the lower the estimated liability will be. For purposes of estimating the liabilities (future and accrued) in this report, you selected an assumption based on the expected long-term rate of return on plan investments. Using a lower discount rate assumption, such as a rate based on long-term bond yields, could substantially increase the estimated present value of future and accrued liabilities.

Methodology, Reliance and Certification (cont.)

This report provides certain financial calculations for use by the auditor. These values have been computed in accordance with our understanding of generally accepted actuarial principles and practices and fairly reflect the actuarial position of the Plan. The various actuarial assumptions and methods which have been used are, in our opinion, appropriate for the purposes of this report.

The report is conditioned on the assumption of an ongoing plan and is not meant to present the actuarial position of the Plan in the case of Plan termination. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status), and changes in plan provisions or applicable law.

The actuarial assumptions and methods used for these valuations meet the parameters set forth in the Governmental Accounting Standards Board (GASB) Statement No. 67, Financial Reporting for Defined Benefit Pension Plans.

We have included the following supporting schedules: Actuarial Basis, Schedule of Member Valuation Data, Summary of Plan Provisions, Summary of Major Legislative changes, a Solvency Test, and Analysis of Financial Experience. We meet the qualification standards of the American Academy of Actuaries to render the actuarial opinions contained in the reports and are currently compliant with the Continuing Professional Development Requirement of the Society of Actuaries.

Order of Attachments by Plan

Attachment A.....Employee’s Retirement Plan

Attachment B.....Police Service Retirement Plan

Attachment C.....Fire Service Retirement Plan

Attachment D.....Detention Officers’ and Deputy Sheriffs’ Retirement Plan

Attachment A

Employees' Retirement Plan

A. Method Used for Funding Purposes

This valuation was performed using the projected unit credit cost method. The contribution equals the sum of the normal cost and the amount necessary to amortize any actuarial gains/(losses) over closed periods. Effective January 1, 2014, new bases due to changes in actuarial assumptions or differences between actual and expected experience are amortized over closed periods of 20 years. New bases due to changes in plan benefits are amortized over the expected future working lifetime of affected employees. Amortization payments increase 3.0% per year.

B. Asset Valuation Method

The actuarial value of assets is determined by spreading the asset gain or loss over a 5-year period. The asset gain or loss is the amount by which the actual market value investment return differs from the expected market value asset return. The method was effective with the 1/1/2011 actuarial valuation. The Actuarial Value of Assets recognizes adjustments resulting from an audit.

There is a six-month lag between the valuation and the fiscal year. The 2016 valuation determines the County contributions due for the fiscal year ending June 30, 2017. Contributions made between the valuation date and the beginning of the next fiscal year (January 1, 2016 to June 30, 2016) have not been treated as assets in the current valuation.

C. Valuation Procedures

Tier One active participants who terminate prior to age 40 are assumed to elect to receive a refund of employee contributions with interest. Employees who terminate at or after age 40 are assumed to receive their vested benefit at normal retirement date.

D. Actuarial Assumptions

The following assumptions were used in valuing the liabilities and benefits under the Plan for purposes of determining contributions and liabilities under GASB. These assumptions are used for all members eligible to receive benefits under the Employees' Plan provisions.

Economic

Investment Return	7.5% compounded annually net of investment expenses (3.0% inflation and 4.5% real return) effective January 1, 2014.
-------------------	--

Salary Increases	A graded schedule is used. See Earnings Progression Table.
------------------	--

Cost of Living Adjustment	Benefits accrued before Bill 88-96 are assumed to increase by 3.0% of the original benefit each year from retirement. Benefits accrued after Bill 88-96 are assumed to increase by 1.8% of the current benefit each year from retirement.
---------------------------	--

Other

Mortality	Healthy: RP-2000 Blue Collar Mortality Table for males and females projected generationally using scale AA. Pre-Termination mortality uses 60% of these rates. Disabled: RP-2000 Blue Collar Mortality Table for males and females set forward nine years and then projected generationally using scale AA. 100% of pre-retirement deaths are assumed to be non-duty-related. Projection to the year of the valuation is assumed to be current experience. The generational projection beyond the valuation date is to account for future mortality improvements. See Table of Sample Rates.
-----------	---

Withdrawal	See Table of Sample Rates.
Disability	See Table of Sample Rates. 10% of disablement is assumed to be duty-related.

Administrative Expenses The average of actual expenses for the two years preceding the valuation date, rounded to the nearest thousand.

Retirement Rates

Age	Service		
	20	30	31
50	6%	40%	40%
55	9%	30%	5%
60	15%	15%	15%
65	40%	40%	40%
68	100%	100%	100%

Percentage Married Males – 70%; Females – 70%

Age Difference Males are assumed to be four years older than their spouses.

Military Service Active liabilities (which depend on credit service) are loaded by 1.0% to account for future crediting of military service.

Disability Leave Active liabilities (which depend on credit service) are loaded by 1.5% to account for future crediting of disability service.

The Tier 1 service cap of 60% is valued as 62% to account for Disability and Military service credit not being limited by the 30-year cap on service.

¹ Includes COLA's

Tier One Members

<i>Compensation</i>	For purposes of the pension plan, compensation is the regular annual rate of pay, exclusive of extra compensation of any kind such as overtime pay, bonuses and commissions.																						
<i>Final Earnings</i>	The average of the highest 3 years of all basic pays.																						
<i>Eligibility Requirements</i>	Full-time general employees of the County will be eligible to participate in the pension plan upon hire.																						
<i>Employee Contributions</i>	4% of compensation.																						
<i>Retirement Date</i>																							
Normal Retirement	The first of the month coincident with or next following the participant's 60 th birthday or, if earlier, when the participant has 30 years of service.																						
Early Retirement	Reduced benefits are available the first of any month coincident with or next following the completion of 20 years of continuous service, provided the participant is at least age 50.																						
Postponed Retirement	A participant may work beyond his normal retirement date and may subsequently retire on the first of any month.																						
<i>Retirement Benefits</i>																							
Normal Retirement	2.0% of final earnings for each year of service (maximum 60% plus 2% times unused disability credit and pre-employment military service credit).																						
Early Retirement	Same as normal retirement, but reduced actuarially for early commencement.																						
	<table> <tr> <th><u>Years Early</u></th><th><u>Reduction Factor</u></th></tr> <tr><td>1</td><td>2%</td></tr> <tr><td>2</td><td>5%</td></tr> <tr><td>3</td><td>9%</td></tr> <tr><td>4</td><td>14%</td></tr> <tr><td>5</td><td>20%</td></tr> <tr><td>6</td><td>28%</td></tr> <tr><td>7</td><td>36%</td></tr> <tr><td>8</td><td>44%</td></tr> <tr><td>9</td><td>52%</td></tr> <tr><td>10</td><td>60%</td></tr> </table>	<u>Years Early</u>	<u>Reduction Factor</u>	1	2%	2	5%	3	9%	4	14%	5	20%	6	28%	7	36%	8	44%	9	52%	10	60%

4	14%																						
5	20%																						
6	28%																						
7	36%																						
8	44%																						
9	52%																						
10	60%																						
Postponed Retirement	Same as normal retirement, but based on continued accrual past normal retirement date.																						
<i>Disability</i>																							
Eligibility	Totally and permanently disabled (except as the result of actions specified in the County code). To receive duty-related disability benefits, there is no service requirement. Five years of service are required to receive non-duty benefits.																						
Duty-Related	The greater of the accrued benefit or 66-2/3% of final earnings, payable immediately, unreduced.																						
Non-Duty	The greater of the accrued benefit or 25% of final earnings, payable immediately, unreduced.																						

Normal form of Payment	Monthly life annuity with modified cash refund.
Termination of Employment	
Less than 5 years of service	Return of employee contributions with 4.25% interest.
5 years of service	At the discretion of the employee, either a return of contributions with interest or the accrued normal retirement benefit taking into account final earnings and service at date of termination, payable at normal retirement date.
Death Benefits	
Married and eligible for early retirement	The greatest of: • \$10 per month • 50% of the final earnings • The accrued benefit, reduced actuarially for early commencement and the joint and 100% survivor form.
Unmarried or not eligible for early retirement	Return of employee contributions with 4.25% interest plus a lump sum of 50% of final earnings.
Cost of Living Increase (simple, for benefits accrued as of 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Prior year benefit plus base benefit multiplied by increase current March CPI from March CPI for prior year. • Benefit increased by 3% of initial benefit.
Cost of Living Increase (compound, for benefits accrued after 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Prior year benefit multiplied by 60% of the increase in current March CPI from March CPI for prior year. • Benefit increased by 2.5%. Benefit payments can be reduced or increased. However, the amount can never be less than the initial benefit amount.
<u>Tier Two Members</u>	
Compensation	For purposes of the pension plan, compensation is the regular annual rate of pay, exclusive of extra compensation of any kind such as overtime pay, bonuses and commissions.
Final Earnings	The average of the highest 3 years of all basic pays.
Eligibility Requirements	Full-time general employees of the County will be eligible to participate in the pension plan upon hire. Members can elect to join Tier One.
Employee Contributions	No employee contributions required or allowed.
Retirement Date	
Normal Retirement	The first of the month coincident with or next following the participant's 60 th birthday or, if earlier, when the participant has 30 years of service.
Early Retirement	Reduced benefits are available the first of any month coincident with or next following the completion of 20 years of continuous service, provided the participant is at least age 50.
Postponed Retirement	A participant may work beyond his normal retirement date and may subsequently retire on the first of any month.

Retirement Benefits

Normal Retirement	1.0% of final earnings for each year of service.
Early Retirement	Same as normal retirement, but reduced actuarially for early commencement (same reduction factors as Tier 1).
Postponed Retirement	Same as normal retirement, but based on continued accrual past normal retirement date.

Normal form of Payment Monthly life annuity.

Disability

Eligibility	Totally and permanently disabled (except as the result of actions specified in the County code). To receive duty-related disability benefits, there is no service requirement. Five years of service are required to receive non-duty benefits.
Duty-Related	The greater of the accrued benefit or 66-2/3% of final earnings, payable immediately, unreduced.
Non-duty	The greater of the accrued benefit or 25% of final earnings, payable immediately, unreduced.

Termination of Employment

Less than 5 years of service	No benefit is payable.
5 years of service	The accrued normal retirement benefit taking into account final earnings and service at date of termination, payable at normal retirement date.

Death benefits

Married and eligible for early retirement	The greatest of: • \$10 per month • 50% of the final earnings • The accrued benefit, reduced actuarially for early commencement and the joint and 100% survivor form.
Unmarried or not eligible for early retirement	A lump sum of 50% of final earnings.

Cost of Living Increase (compound)

Retiree benefits are adjusted each year. The revised benefit amount is the lesser of:

- Prior year benefit multiplied by 60% of the increase in current March CPI from March CPI for prior year.
- Benefit increased by 2.5%.

Benefit payments can be reduced or increased. However, the amount can never be less than the initial benefit amount.

Anne Arundel County Retirement and Pension System
Employees' Retirement Plan – Summary of Major Legislative Changes
December 31, 2015

County Council Bill No. 34-92	Effective 6/1/92 through 8/31/92
	Participants age 50 or older with at least 20 years of service could elect to retire with an additional pension equal to 1/12 of 2% for each year of credited service. The additional amount could be taken as a pension increase, a lump sum, or as a temporary supplement to age 62. Appropriate actuarial adjustments apply.
State House Bill No. 687	Effective 7/1/90
	County employees were given the opportunity to apply for credit under the County's plan for previous service with the State of Maryland (or a political subdivision of the State).
County Council Bill No. 90-93	Effective 12/22/93
	Plan participants are required to pay the full actuarial value of service purchases. Purchases can only be made at retirement. To be eligible, an employee must have 60 months of County service. Existing plan participants must be notified of their right to purchase service under existing law.
County Council Bill No. 82-94	Effective 10/31/94
	Transfers assets from general employees plan to A&E plan for participants who have transferred between these two plans.
County Council Bill No. 88-96	Effective 12/4/96
	The previous method of calculating cost of living increase will only apply to benefits accrued as of 1/31/97. The cost of living increase for future benefits is a compound increase equal to 60% of the annual change in the CPI, not to exceed 2.5%. Employees hired, or rehired, on or after 12/4/96 will be Tier Two employees and will have different benefits than current employees.
County Council Bill No. 41-99	Effective 6/15/99
	Employees paid under the deputy sheriff employees pay schedule become Tier Two members of the Detention Center Plan effective as of January 1, 1999. Service credited under the Employees' Plan will count as credited service in the Detention Center Plan and no future benefit will be paid from the Employees' Plan. Assets are transferred from the Employees' Plan to the Detention Center Plan in an amount equal to the projected unit credit accrued liability in the Employees' Plan.
Recodification	Effective 2/25/2002
	Allows a benefit based on disability leave service and pre-plan military service to be paid over the 60% cap. Normal retirement was changed to the earlier of 30 years of service or age 60.
County Council Bill No. 74-09	Effective 12/11/2009.
	For non-represented members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 3% for determining the final average basic pay.
County Council Bill No. 6-10	Effective 4/18/2010.
	Provides for a disability benefit for those participants who are totally and permanently disabled as a result of qualified military service.
County Council Bill No. 98-12	Effective 5/13/2013.
	Changed the definition of "final average basic pay" from highest 3 out of the last 5 years basic pays to highest 3 of all basic pays.

Analysis of Financial Experience

Reasons for Change in the Unfunded Accrued Liability

The unfunded accrued liability decreased from \$198,310,522 to \$180,873,327. The decrease is due to lower than expected retiree COLA increases in July 2015 and lower than expected payroll growth. The funded status increased from 74.6% to 77.0%.

Reasons for Change in Contribution Rates

The employer contribution rate decreased from 20.8% for the fiscal year ending June 30, 2016 to 19.7% for the fiscal year ending June 30, 2017. The decrease of 1.1% is due to the following reasons:

Investment Performance	0.6%
Pay Increases	-0.4%
New Entrants/Change in Normal Cost	-0.1%
COLAs	-0.8%
Change in Expenses	-0.1%
Demographics and Other Changes	-0.3%
Total	-1.1%

Net Pension Liability of the County

The components of the net pension liability of the County at December 31, 2015, were as follows:

Total pension liability	\$ 812,569,878
Plan fiduciary net position	<u>(564,282,661)</u>
County's net pension liability	<u>\$ 248,287,217</u>
Plan fiduciary net position as a percentage of the total pension liability	69.44%

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of December 31, 2015 using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A nine-year set forward is used for post-disability mortality.

The above is a summary of key actuarial assumptions. Full descriptions of the actuarial assumptions are available in the January 2015 actuarial valuation report.

Sensitivity of the net pension liability to changes in the discount rate

	<i>1% Decrease</i> <u>6.50%</u>	<i>Current Discount</i> <u>Rate</u> <u>7.50%</u>	<i>1% Increase</i> <u>8.50%</u>
County's net pension liability	\$ 341,266,312	\$ 248,287,217	\$ 169,744,307

Notes to Schedule:

Benefit changes:

There are no benefit changes reflected in the current schedule.

Changes of assumptions:

For FY2014, the expected rate of investment return was reduced from 8.0% to 7.5% and other assumptions were changed to reflect the results of the 2012 experience study.

Anne Arundel County Retirement and Pension System
Employees' Retirement Plan – Actuarial Information
December 31, 2015

Schedule of County Contributions

Last 10 Fiscal Years

(Dollar amounts in thousands)

	2015	2014	2013	2012	2011	2010	2009	2008	2007	2006
Actuarially determined contribution	\$ 25,655	\$ 24,426								
Contributions in relation to the actuarially determined contribution	25,630	24,451								
Contribution deficiency (excess)	<u>\$ 25</u>	<u>\$ (25)</u>								
Covered-employee payroll ¹	\$ 127,827	\$ 127,091								
Contributions as a percentage of covered employee payroll	20.05%	19.24%								

Information for FY2013 and earlier is not available

¹ Amounts shown are based on pensionable earnings only. The payroll for 2014 has been changed to reflect the new GASB language.

Notes to Schedule

Valuation date:

Actuarially determined contribution amounts are calculated as of each January 1 for the upcoming County fiscal year beginning July 1. Actuarial valuations are performed every year.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Projected Unit Credit
Amortization method	Level percent of payroll (closed), increasing 3.0% per year.
Remaining amortization period	Remaining Amortization periods range from 18 to 27 years.
Asset valuation method	5-year smoothed market
Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Retirement age	Rates vary by participant age and service
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A nine-year set forward is used for post-disability mortality.

Attachment B

Police Service Retirement Plan

A. Method Used for Funding Purposes

This valuation was performed using the projected unit credit cost method. The contribution equals the sum of the normal cost and the amount necessary to amortize any actuarial gains/(losses) over closed periods. Effective January 1, 2014, new bases due to changes in actuarial assumptions or differences between actual and expected experience are amortized over closed periods of 20 years. New bases due to changes in plan benefits are amortized over the expected future working lifetime of affected employees. Amortization payments increase 3.0% per year.

B. Asset Valuation Method

The actuarial value of assets is determined by spreading the asset gain or loss over a 5-year period. The asset gain or loss is the amount by which the actual market value investment return differs from the expected market value asset return. The method was effective with the 1/1/2011 actuarial valuation. The Actuarial Value of Assets recognizes adjustments resulting from the final prior year's audit.

There is a six-month lag between the valuation and the fiscal year. The 2016 valuation determines the County contributions due for the fiscal year ending June 30, 2017. Contributions made between the valuation date and the beginning of the next fiscal year (January 1, 2016 to June 30, 2016) have not been treated as assets in the current valuation.

C. Valuation Procedures

Generally, the plan provides a 100% survivor benefit to the spouse at the time of the retiree's death. This allows for post retirement marriages. We have valued the forms of payment originally coded in the data or based this on marital status at time of retirement (generally a 100% survivor benefit but not always). Starting with the 2008 valuation, all new retirements are valued with a 100% Joint and Survivor form of payment.

D. Actuarial Assumptions

The following assumptions were used in valuing the liabilities and benefits under the Plan for purposes of determining contributions and liabilities under GASB. These assumptions are used for all members eligible to receive benefits under the Police Service Retirement Plan provisions.

Economic

Investment Return	7.5% compounded annually net of investment expenses (3.0% inflation and 4.5% real return) effective January 1, 2014.
Salary Increases	A graded schedule is used. See Earnings Progression Table.
Cost of Living Adjustment	Benefits accrued before Bill 88-96 are assumed to increase by 3.0% of the current benefit each year from retirement effective January 1, 2014. Benefits accrued after Bill 88-96 are assumed to increase by 1.8% of the current benefit each year from retirement effective January 1, 2014.

Other

Mortality	Healthy: RP-2000 Blue Collar Mortality Table for males and females projected generationally using scale AA. Pre-Termination mortality uses 60% of these rates. Disabled: RP-2000 Blue Collar Mortality Table for males and females set forward five years and then projected generationally using scale AA. 100% of pre-retirement deaths are assumed to be non-duty-related. Projection to the year of the valuation is assumed to be current experience. The generational projection beyond the valuation date is to account for future mortality improvements. See Table of Sample Rates.
Withdrawal	See Table of Sample Rates.
Disability	See Table of Sample Rates. 75% of disablement is assumed to be duty-related.

Administrative Expenses The average of actual expenses for the two years preceding the valuation date, rounded to the nearest thousand.

Prudential Benefits Our calculations reflect that some benefits have already been purchased.

Retirement Rates¹ Sample Rates:

¹² Includes COLA's

Compensation

For purposes of the pension plan, compensation is the regular annual rate of pay, exclusive of extra compensation of any kind such as overtime pay, bonuses and commissions.

Final Earnings

The average of the highest 3 years of all basic pays.

Eligibility Requirements

Full-time employees occupying the classes of work listed below and making contributions to the plan will be eligible to participate in the pension plan upon hire:

- Police Officer
- Police Sergeant
- Police Lieutenant
- Police Captain
- Police Major
- Deputy Police Chief
- Chief of Police, by election

Employee Contributions
Retirement Date

7.25% of compensation for all participants.

Normal Retirement

The first of the month coincident with or next following the participant's 50th birthday with 5 years of service or the completion of 20 years of service. For those hired prior to February 25, 2002, the five years of service is not required.

Postponed Retirement

A participant may work beyond his normal retirement date and may subsequently retire on the first of any month.

Retirement Benefits

Normal Retirement

2.5% of final earnings for each year of service up to 20 years plus 2.0% of final earnings per year of service in excess of 20 years (maximum 70% plus 2% times unused disability credit and pre-employment military service credit).

Postponed Retirement

Same as normal retirement, but based on continued accrual past normal retirement date.

Normal Form of Payment

For single participants, monthly life annuity with payments guaranteed for 5 years. For married participants, unreduced 100% joint and survivor annuity with payments

	guaranteed for 5 years.
Disability	
Eligibility	Totally and permanently disabled (except as the result of activities specified in the County code) regardless of length of service.
Duty-Related	The greater of the accrued benefit or 66-2/3% of final earnings, payable immediately, unreduced.
Non-Duty	The greater of the accrued benefit or 20% of final earnings, payable immediately, unreduced.
Termination of Employment	
Less than 20 years of service	Return of employee contributions with 3.00% interest.
Death Benefits	
Married	Duty-Related: Greater of accrued benefit or 66-2/3% of final earnings. Non-duty Related: Accrued Benefit.
Unmarried	Return of employee contributions with 3.00% interest plus, if one or more years of service, a lump sum of 50% of final earnings.
Cost of Living Increase (for benefits accrued as of 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Base benefit multiplied by ratio of current 12 month average CPI to 12 month average CPI at retirement. • Prior year benefit increased by 4%. Benefit payments can be reduced or increased. However, the amount can never be less than the initial amount.
Cost of Living Increase (for benefits accrued after 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Prior year benefit multiplied by 60% of the increase in current March CPI from March CPI for prior year. • Prior year benefit increased by 2.5%. Benefit payments can be reduced or increased. However, the amount can never be less than the initial amount.
Deferred Retirement Option Program (DROP)	Allows accumulation of pension after 20 years of County service. DROP period must be between 3 and 5 years. Members may remain in DROP for a sixth year, but no interest shall be credited to the DROP account in the sixth year.

County Council Bill No. 34-92	Effective 6/1/92 through 8/31/92
	Participants age 50 or with at least 20 years of service could elect to retire with an additional pension equal to 1/12 of 2.5% of final earnings for the first 20 years of service, plus 1/12 of 2% of final earnings for each additional year of service. The additional amount could be taken as a pension increase, a lump sum, or as a temporary supplement to age 62. Appropriate actuarial adjustments apply.
County Council Bill No. 66-92	Effective 7/2/92
	The plan was amended to allow normal, unreduced retirement after 20 years of service.
	Employee contributions were increased to 6% from 5%.
	Participants under age 50 were not allowed to retire and receive retirement incentives (under Bill No. 34-92) in addition to unreduced retirement. They could either retire early with the incentives, or normally without the incentives.
State House Bill No. 687	Effective 7/1/90
	County employees were given the opportunity to apply for credit under the County's plan for previous service with the State of Maryland (or a political subdivision of the State).
County Council Bill No. 88-96	Effective 12/4/96
	The previous method of calculating cost of living increase will only apply to benefits accrued as of 1/31/97. The cost of living increase for future benefits is a compound increase equal to 60% of the annual change in the CPI, not to exceed 2.5%. Employees hired, or rehired, on or after 12/4/96 will be Tier Two employees and will have different benefits than current employees.
Recodification	Effective 2/25/2002
	Allows a benefit based on disability leave service and pre-plan military service to be paid over the 70% cap. Normal Retirement was changed to the earlier of 20 years of service or age 50 with 5 years of service. Elimination of Tier 2 benefits. Implemented a Deferred Retirement Option Program (DROP), a voluntary program that provides an alternative way to earn and receive retirement benefits.
County Council Bill No. 66-05	Effective 10/10/2005
	Reduced the contribution percentage for Category II participants from 6% to 5%.
County Council Bill No. 58-07	Effective 10/11/2007
	Reduced the contribution percentage for Category I participants from 6% to 5%.
County Council Bill 74-09	Effective 12/11/2009.
	For non-represented members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 3% for determining the average basic pay. Clarified the limits on those entering DROP. The effective annual interest rate for the DROP account changed from 8% to 4.25% for those entering DROP on or after July 1, 2009.
County Council Bill No. 6-10	Effective 4/18/2010
	Provides for a disability benefit for those participants who are totally and permanently disabled as a result of qualified military service.
County Council Bill 41-10	Effective 7/1/2010.
	Increased the contribution rate for Police Officers, Police Officer First Class, Police Corporals, and Police Sergeants to 7.25%.
County Council Bill No. 98-12	Effective 5/13/2013.
	Changed the definition of "final average basic pay" from highest 3 out of the last 5 years basic pays to highest 3 of all basic pays.

County Council Bill No. 30-12	Effective 2/1/2013
	All participant except for those in the Police Lieutenant classification shall contribute 7.25% of his or her annual basic pay in each calendar year or portion of a calendar year while an active participant in the plan.
County Council Bill No. 67-12	Effective 2/1/2013
	Participant in the Police Lieutenant classification shall contribute 7.25% of his or her annual basic pay in each calendar year or portion of a calendar year while an active participant in the plan.

Analysis of Financial Experience

Reasons for Change in the Unfunded Accrued Liability

The unfunded accrued liability increased from \$131,983,303 to \$136,526,375. The increase is partly due to recognition of investment returns below the assumption of 7.5%. The funded status remained 78.5%.

Reasons for Change in Contribution Rates

The employer contribution rate decreased from 42.1% for the fiscal year ending June 30, 2016 to 42.6% for the fiscal year ending June 30, 2017. The increase of 0.5% is due to the following reasons:

Investment Performance	1.6%
Pay Increases	0.2%
New Entrants/Change in Normal Cost	-0.5%
COLA	-0.8%
Changes in Expenses	-0.2%
Demographics and Other Changes	0.2%
Total	0.5%

¹ Does not include contribution balances for any participants currently in DROP

Net Pension Liability of the County

The components of the net pension liability of the County at December 31, 2015, were as follows:

Total pension liability	\$ 643,772,887
Plan fiduciary net position	(463,225,492)
County's net pension liability	<u>\$ 180,547,395</u>
Plan fiduciary net position as a percentage of the total pension liability	71.95%

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of December 31, 2015 using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A five-year set forward is used for post-disability mortality.

The above is a summary of key actuarial assumptions. Full descriptions of the actuarial assumptions are available in the January 1, 2015 actuarial valuation report.

Sensitivity of the net pension liability to changes in the discount rate

	<i>1% Decrease</i> <u>6.50%</u>	<i>Current Discount</i> <u>Rate</u> <u>7.50%</u>	<i>1% Increase</i> <u>8.50%</u>
County's net pension liability	\$ 264,271,466	\$ 180,547,395	\$ 112,217,441

Notes to Schedule

Valuation date:

Actuarially determined contribution amounts are calculated as of each January 1 for the upcoming County fiscal year beginning July 1. Actuarial valuations are

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Projected Unit Credit
Amortization method	Level percent of payroll (closed), increasing 3.0% per year.
Remaining amortization period	Remaining Amortization periods range from 18 to 27 years.
Asset valuation method	5-year smoothed market
Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Retirement age	Rates vary by participant age and service
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A five-year set forward is used for post-dis

Attachment C

Fire Service Retirement Plan

A. Method Used for Funding Purposes

This valuation was performed using the projected unit credit cost method. The contribution equals the sum of the normal cost and the amount necessary to amortize any actuarial gains/(losses) over closed periods. Effective January 1, 2014, new bases due to changes in actuarial assumptions or differences between actual and expected experience are amortized over closed periods of 20 years. New bases due to changes in plan benefits are amortized over the expected future working lifetime of affected employees. Amortization payments increase 3.0% per year.

B. Asset Valuation Method

The actuarial value of assets is determined by spreading the asset gain or loss over a 5-year period. The asset gain or loss is the amount by which the actual market value investment return differs from the expected market value asset return. The method was effective with the 1/1/2011 actuarial valuation. The Actuarial Value of Assets recognizes adjustments resulting from an audit.

There is a six month lag between the valuation and the fiscal year. The 2016 valuation determines the County contribution due for the fiscal year ending June 30, 2017. Contributions made between the valuation date and the beginning of the next fiscal year (January 1, 2016 to June 30, 2016) have not been treated as assets in the current valuation.

C. Valuation Procedures

Generally, the plan provides a 100% survivor benefit to the spouse at the time of the retiree's death. This allows for post retirement marriages. We have valued the forms of payment originally coded in the data or based this on marital status at time of retirement (generally a 100% survivor benefit but not always). Starting with the 2008 valuation, all new retirements are valued with a 100% Joint and Survivor form of payment.

D. Actuarial Assumptions

The following assumptions were used in valuing the liabilities and benefits under the Plan for purposes of determining contributions and liabilities under GASB. These assumptions are used for all members eligible to receive benefits under the Fire Plan provisions.

Economic

Investment Return	7.5% compounded annually net of investment expenses (3.0% inflation and 4.5% real return) effective January 1, 2014.
-------------------	--

Salary Increases	A graded schedule is used. See Earnings Progression Table.
------------------	--

Cost of Living Adjustment	Benefits accrued before Bill 88-96 are assumed to increase by 3.0% of the current benefit each year from retirement. Benefits accrued after Bill 88-96 are assumed to increase by 1.8% of current benefit each year from retirement.
---------------------------	---

Other

Mortality	Healthy: RP-2000 Blue Collar Mortality Table for males and females projected generationally using scale AA. Pre-Termination mortality uses 60% of these rates. Disabled: RP-2000 Blue Collar Mortality Table for males and females set forward five years and then projected generationally using scale AA. 100% of pre-retirement deaths are assumed to be non-duty-related. Projection to the year of the valuation is assumed to be current experience. The generational projection beyond the valuation date is to account for future mortality improvements. See Table of Sample Rates.
-----------	---

Withdrawal	See Table of Sample Rates.
------------	----------------------------

Disability	See Table of Sample Rates. 75% of disablement is assumed to be duty-related.
------------	--

Administrative Expenses	The average of actual expenses for the two years preceding the valuation date, rounded to the nearest thousand.
-------------------------	---

Prudential Benefits Our calculations reflect that some benefits have already been purchased.

¹² Includes COLA's

Compensation

For purposes of the pension plan, compensation is the regular annual rate of pay, exclusive of extra compensation of any kind such as overtime pay, bonuses and commissions.

Final Earnings

The average of the highest 3 years of all basic pays.

Eligibility Requirements

Full-time employees occupying the classes of work listed below and making contributions to the plan will be eligible to participate in the pension plan upon hire:

- Fire Fighter II
- Fire Fighter III
- Fire Fighter/Cardiac Rescue Technician
- Fire Fighter/Emergency Medical Technician Paramedic
- Fire Lieutenant
- Fire Captain
- Fire Battalion Chief
- Fire Division Chief
- Deputy Fire Chief
- Fire Chief, by election

Employee Contributions

7.25% of compensation for all participants.

Retirement Date

Normal Retirement

The first of the month coincident with or next following the participant's 50th birthday and 5 years of service or the completion of 20 years of service.

Postponed Retirement

A participant may work beyond his normal retirement date and may subsequently retire on the first of any month.

Retirement Benefits

Normal Retirement

2.5% of final earnings for each year of service up to 20 years plus 2.0% of final earnings per year of service in excess of 20 years (maximum 70% plus 2% times unused disability credit and pre-employment military service credit.)

Postponed Retirement	Same as normal retirement, but based on continued accrual past normal retirement date.
Normal Form of Payment	For single participants, monthly life annuity with payments guaranteed for 5 years. For married participants, unreduced 100% joint and survivor annuity with payments guaranteed for 5 years.
Disability	
Eligibility	Totally and permanently disabled (except as the result of activities specified in the Country code) regardless of length of service.
Duty-Related	The greater of the accrued benefit or 66-2/3% of final earnings, payable immediately, unreduced.
Non-Duty	The greater of the accrued benefit or 20% of final earnings, payable immediately, unreduced.
Termination of Employment	Return of employee contributions with 3.00% interest.
Death Benefits	
Married	Duty-Related: Greater of accrued benefit or 66-2/3% of final earnings. Non-duty Related: Accrued Benefit.
Unmarried	Return of employee contributions with 3.00% interest plus, if one or more years of service, a lump sum of 50% of final earnings..
Cost of Living Increase (for benefits accrued as of 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Base benefit multiplied by ratio of current 12 month average CPI to 12 month average CPI at retirement. • Prior year benefit increased by 4%. Benefit payments can be reduced or increased. However, the amount can never be less than the initial benefit amount.
Cost of Living Increase (for benefits accrued after 1/31/97)	Retiree benefits are adjusted each year. The revised benefit amount is the lesser of: • Prior year benefit multiplied by 60% of the increase in current March CPI from March CPI for prior year. • Prior year benefit increased by 2.5%. Benefit payments can be reduced or increased. However, the amount can never be less than the initial benefit amount.
Deferred Retirement Option Program (DROP)	Allows accumulation of pension after 20 years of County service. DROP period must be between 3 and 5 years. Members may remain in DROP for a sixth year, but no interest shall be credited to the DROP account in the sixth year.

Anne Arundel County Retirement and Pension System
Fire Service Retirement Plan - Summary of Major Legislative Changes
December 31, 2015

County Council Bill No. 48-89	Effective 9/13/89
	The previously combined Police and Fire plan was separated into distinct plans for each group.
	The reduction for retirement prior to age 50 was changed to 0.2% per month from 0.3% per month.
County Council Bill No. 34-92	Effective 6/1/92 through 8/31/92
	Participants age 50 or with at least 20 years of service could elect to retire with an additional pension equal to 1/12 of 2.5% of final earnings for the first 20 years of service, plus 1/12 of 2% of final earnings for each additional year of service. The additional amount could be taken as a pension increase, a lump sum, or as a temporary supplement to age 62. Appropriate actuarial adjustments apply.
State House Bill No. 687	Effective 7/1/90
	County employees were given the opportunity to apply for credit under the County's plan for previous service with the State of Maryland (or a political subdivision of the State).
County Council Bill No. 88-96	Effective 12/4/96
	The previous method of calculating cost of living increase will only apply to benefits accrued as of 1/31/97. The cost of living increase for future benefits is a compound increase equal to 60% of the annual change in the CPI, not to exceed 2.5%. Employees hired, or rehired, on or after 12/4/96 will be Tier Two employees and will have different benefits than current employees.
County Council Bill No. 80-00 Recodification	Effective 2/25/2002
	Allows a benefit based on disability leave service and pre-plan military service to be paid over the 70% cap. Normal Retirement was changed to the earlier of 20 years of service or age 50 with 5 years of service. Elimination of Tier 2 benefits. Implemented a Deferred Retirement Option Program (DROP), a voluntary program that provides an alternative way to earn and receive retirement benefits (retroactive to 1/1/2001).
County Council Bill 74-09	Effective 12/11/2009
	For non-represented members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 3% for determining the final average basic pay. For represented members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 5% for determining the final average basic pay.
County Council Bill 6-10	Effective 4/18/2010
	Provides for a disability benefit for those participants who are totally and permanently disabled as a result of qualified military service.
County Council Bill 41-10	Reduced the DROP interest rate from 8 % to 4.25%. Increased the contribution rate for all but Battalion Chief, Division Chief, Deputy Chief and Fire Chief to 7.25%.
County Council Bill No. 98-12	Effective 5/13/2013.
	Changed the definition of "final average basic pay" from highest 3 out of the last 5 years basic pays to highest 3 of all basic pays.
County Council Bill No. 30-12	Effective 2/1/2013
	All participant shall contribute 7.25% of his or her annual basic pay in each calendar year or portion of a calendar year while an active participant in the plan.

Analysis of Financial Experience

Reasons for Change in the Unfunded Accrued Liability

The unfunded accrued liability decreased from \$77,220,761 to \$71,386,029. The decrease is partly due to smaller than expected retiree COLAs and the significant number of new hires. The funded status increased from 86.4% to 87.6%.

Reasons for Change in Contribution Rates

The employer contribution rate decreased from 30.6% for the fiscal year ending June 30, 2016 to 29.1% for the fiscal year ending June 30, 2017. The decrease of 1.5% is due to the following reasons:

Investment Performance	1.5%
Pay Increases	-0.5%
New Entrants/Change in Normal Cost	-0.4%
COLA	-1.0%
Change in Expenses	-0.2%
Demographics and Other Changes	-0.9%
Total	-1.5%

¹ Does not include contribution balances for any participants currently in DROP

Anne Arundel County Fire Service Plan
 Actuarial Information to Include in the Financial Statements
 For the December 31, 2015 Measurement Date

Net Pension Liability of the County

The components of the net pension liability of the County at December 31, 2015, were as follows:

Total pension liability	\$ 580,859,883
Plan fiduciary net position	(468,239,077)
County's net pension liability	<u>\$ 112,620,806</u>
Plan fiduciary net position as a percentage of the total pension liability	80.61%

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of December 31, 2015 using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A five-year set forward is used for post-disability mortality.

The above is a summary of key actuarial assumptions. Full descriptions of the actuarial assumptions are available in the January 1, 2015 actuarial valuation report.

Sensitivity of the net pension liability to changes in the discount rate

	<i>1% Decrease</i> <u>6.50%</u>	<i>Current Discount</i> <i>Rate</i> <u>7.50%</u>	<i>1% Increase</i> <u>8.50%</u>
County's net pension liability	\$ 188,098,432	\$ 112,620,806	\$ 50,936,581

Information for FY2013 and earlier is not available

¹ Amounts shown are based on pensionable earnings only. The payroll for 2014 has been changed to reflect the new GASB language.

Notes to Schedule

Valuation date:

Actuarially determined contribution amounts are calculated as of each January 1 for the upcoming County fiscal year beginning July 1. Actuarial valuations are performed every year.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Projected Unit Credit
Amortization method	Level percent of payroll (closed), increasing 3.0% per year.
Remaining amortization period	Remaining Amortization periods range from 18 to 27 years.
Asset valuation method	5-year smoothed market
Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Retirement age	Rates vary by participant age and service
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A five-year set forward is used for post-disability mortality.

Attachment D

Detention Officers' and Deputy Sheriffs' Retirement Plan

A. Method Used for Funding Purposes

This valuation was performed using the projected unit credit cost method. The contribution equals the sum of the normal cost and the amount necessary to amortize any actuarial gains/(losses) over closed periods. Effective January 1, 2014, new bases due to changes in actuarial assumptions or differences between actual and expected experience are amortized over closed periods of 20 years. New bases due to changes in plan benefits are amortized over the expected future working lifetime of affected employees. Amortization payments increase 3.0% per year.

B. Asset Valuation Method

The actuarial value of assets is determined by spreading the asset gain or loss over a 5-year period. The asset gain or loss is the amount by which the actual market value investment return differs from the expected market value asset return. The method was effective with the 1/1/2011 actuarial valuation. The Actuarial Value of Assets recognizes adjustments resulting from an audit.

There is a six-month lag between the valuation and the fiscal year. The 2016 valuation determines the County contribution due for the fiscal year ending June 30, 2017. Contributions made between the valuation date and the beginning of the next fiscal year (January 1, 2016 to June 30, 2016) have not been treated as assets in the current valuation.

C. Valuation Procedures

Active participants who terminate prior to age 40 are assumed to elect to receive a refund of employee contributions with interest. Employees who terminate at or after age 40 are assumed to receive their vested benefit at normal retirement date.

D. Actuarial Assumptions

The following assumptions were used in valuing the liabilities and benefits under the Plan for purposes of determining contributions and liabilities under GASB. These assumptions are used for all members eligible to receive benefits under the Detention Officers and Deputy Sheriffs' Retirement Plan provisions.

Economic

Investment Return 7.5% compounded annually net of investment expenses (3.0% inflation and 4.5% real return) effective January 1, 2014.

Salary Increases A graded schedule is used. See Earnings Progression Table.

Cost of Living Adjustment Benefits accrued before Bill 88-96 are assumed to increase by 3.0% of the original benefit each year from retirement.
 Benefits accrued after Bill 88-96 are assumed to increase by 1.8% of the current benefit each year from retirement.

Other

Mortality Healthy: RP-2000 Blue Collar Mortality Table for males and females projected generationally using scale AA. Pre-Termination mortality uses 60% of these rates.
 Disabled: RP-2000 Blue Collar Mortality Table for males and females set forward five years and then projected generationally using scale AA. 100% of pre-retirement deaths are assumed to be non-duty-related. Projection to the year of the valuation is assumed to be current experience. The generational projection beyond the valuation date is to account for future mortality improvements. See Table of Sample Rates.

Withdrawal See Table of Sample Rates.

Disability See Table of Sample Rates. 75% of disablement is assumed to be duty-related.

Administrative Expenses The average of actual expenses for the two years preceding the valuation date, rounded to the nearest thousand.

² Includes COLA's

Compensation	For purposes of the pension plan, compensation is the regular annual rate of pay, exclusive of extra compensation of any kind such as overtime pay, bonuses and commissions.
Final Earnings	The average of the highest 3 years of all basic pays.
Eligibility Requirements	Permanent employees who work at least 50% of the time specified for their position. They are either Category I or Category II
Category I	• Detention Officer • Detention Corporal • Detention Sergeant • Detention Lieutenant • Detention Captain • Deputy Sheriff I, II, III, and IV
Category II	• Correctional Program Specialist I and II • Criminal Justice Program Supervisor • Correctional Facility Administrator • Assistant Correctional Facility Administrator • Superintendent of Detention Facilities, by election
Employee Contributions	6.75% of compensation for Detention Officer, Detention Corporal or Detention Sergeant. 5% of compensation for all others.
Retirement Date	
Normal Retirement	Category I: The first of the month coincident with or next following the participant's 50th birthday and five years of service or 20 years of service whichever comes first. Category II: The first of the month coincident with or next following the participant's 50th birthday and five years of service.
Early Retirement	Reduced benefits are available the first of any month coincident with or next following the completion of 20 years of continuous service for Category II.
Postponed Retirement	A participant may work beyond his normal retirement date and may subsequently retire on the first of any month.
Retirement Benefits	
Normal Retirement	2.5% of final earnings for each year of service up to 20 years plus 2.0% of final earnings per year of service in excess of 20 years (maximum 70% plus 2% times unused disability credit and pre-employment military service credit)
Early Retirement	Same as normal retirement but reduced for early commencement.
Postponed Retirement	Same as normal retirement, but based on continued accrual past normal retirement date.
Normal Form of Payment	Monthly life annuity with payments guaranteed for 5 years.
Disability	
Eligibility	Totally and permanently disabled (except as the result of activities specified in the County code) regardless of length of service.

Duty-Related	The greater of the accrued benefit or 66-2/3% of final earnings, payable immediately, unreduced.
--------------	--

Non-Duty	The greater of the accrued benefit or 20% of final earnings, payable immediately, unreduced.
----------	--

Termination of Employment

Less than 5 years of service	Return of employee contributions with 4.25% interest.
------------------------------	---

5 years of service or more	At the discretion of the employee, either a return of contributions with interest or the accrued normal retirement taking into account final earnings and service at date of termination, payable at normal retirement date.
----------------------------	--

Death Benefits

Married and eligible for retirement	Duty-Related: Greater of accrued benefit or 66-2/3% of final earnings. Non-duty Related: Accrued Benefit.
-------------------------------------	--

Unmarried or not eligible for retirement	Return of employee contributions with 4.25% interest plus a lump sum equal to 50% of annual pay.
--	--

Cost of Living Increase
 (simple, for benefits accrued as of 1/31/97)

Retiree benefits are adjusted each year. The revised benefit amount is the lesser of:

- Prior year benefit plus base benefit multiplied by increase in current CPI from CPI for prior year.
- Benefit increased by 4% of original benefit.

Cost of Living Increase
 (compound, for benefits accrued after 1/31/97)

Retiree benefits are adjusted each year. The revised benefit amount is the lesser of:

- Prior year benefit multiplied by 60% of the increase in current March CPI from March CPI for prior year.
- Prior year Benefit increased by 2.5%.

Deferred Retirement Option Program (DROP)

Allows accumulation of pension after 20 years of County service. DROP period must be between 3 and 5 years. Members may remain in DROP for a sixth year, but no interest shall be credited to the DROP account in the sixth year

Anne Arundel County Retirement and Pension System
 Detention Officers' and Deputy Sheriffs' Retirement Plan – Summary of Major Legislative Changes
 December 31, 2015

State House Bill No. 687	Effective 7/1/90
	County employees were given the opportunity to apply for credit under the County's plan for previous service with the State of Maryland (or a political subdivision of the State).
County Council Bill 90-93	Effective 12/22/93
	Plan participants are required to pay the full actuarial value for service purchases. Purchases can only be made at retirement. To be eligible, an employee must have 60 months of County service. Existing plan participants must be notified of their right to purchase service under existing law.
County Council Bill No. 94-93	Effective 11/19/93
	All current and future employees shall be 100% vested after 5 years of Credited service.
County Council Bill No. 88-96	Effective 12/4/96
	The previous method of calculating cost of living increase will only apply to benefits accrued as of 1/31/97. The cost of living increase for future benefits is a compound increase equal to 60% of the annual change in the CPI, not to exceed 2.5%. Employees hired, or rehired, on or after 12/4/96 will be Tier Two employees and will have different benefits than current employees.
County Council Bill No. 41-99	Effective 6/15/99
	Employees paid under the deputy sheriff employees pay schedule become members of the Detention Center Plan effective as of January 1, 1999. Service credited under the Employees' Plan will count as credited service in the Detention Center plan and no future benefit will be paid from the Employees' Plan. Assets are transferred from the Employees' Plan to the Detention Center Plan in an amount equal to the projected unit credit accrued liability in the Employees' Plan.
Recodification	Effective 2/25/2002
	Allows a benefit based on disability leave service and pre-plan military service to be credited over the 70% cap. Elimination of Tier Two benefits. Changed early retirement factors. Added a death benefit.
County Council Bill No. 32-04	Effective 7/1/2004
	Allows retirement after 20 years of service for "Category I" participants. Changes vesting for new hires from 5 years to 20 years. Provides for employees contributions to be made on a pre-tax ("pick up") basis.
County Council Bill No. 74-09	Effective 12/11/2009
	For non-represented members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 3% for determining the final average basic pay. For D3 and S2 members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 4% for determining the final average basic pay.
County Council Bill No. 78-09	Effective 11/16/2009
	For D1 and D2 members, FY2010 annual pay shall be determined by increasing FY2009 annual pay by an assumed 4% for determining the final average basic pay.
County Council Bill No. 6-10	Effective 4/18/2010
	Provides for a disability benefit for those participants who are totally and permanently disabled as a result of qualified military service.
County Council Bill 41-10	Effective 7/1/2010
	Increased the contribution rate for Detention Officers, Detention Corporals and Detention Sergeants to 6.75%. Added a "pop-up" option.
County Council Bill No. 98-12	Effective 5/13/2013.
	Changed the definition of "final average basic pay" from highest 3 out of the last 5 years basic pays to highest 3 of all basic pays.

Anne Arundel County Retirement and Pension System
 Detention Officers' and Deputy Sheriffs' Retirement Plan – Summary of Major Legislative Changes
 December 31, 2015

County Council Bill No. 30-12	Effective 2/1/2013
	A participant in the classification of Detention Officer, Detention Corporal, or Detention Sergeant shall contribute 6.75% of his or her annual basic pay in each calendar year or portion of a calendar year while an active participant in the plan.
County Council Bill No. 50-15	Effective 7/23/2015
	Implemented a Deferred Retirement Option Program (DROP), a voluntary program that provides an alternative way to earn and receive retirement benefits

Analysis of Financial Experience

Reasons for Change in the Unfunded Accrued Liability

The unfunded accrued liability increased from \$42,967,165 to \$44,138,983. The increase is due in part to the addition of the DROP provision and recognition of investment returns below the assumption of 7.5%. The funded status increased from 72.3% to 73.

Reasons for Change in Contribution Rates

The employer contribution rate increased from 33.0% for the fiscal year ending June 30, 2016 to 34.3% for the fiscal year ending June 30, 2017. The increase of 1.3% is due to the following reasons:

Investment Performance	1.0%
Pay Increases	0.3%
New Entrants/ Change in Normal Cost	0.2%
COLA	-1.5%
Change in Expenses	-0.1%
Plan Changes(DROP)	1.4%
Demographics and Other Changes	0.0%
Total	1.3%

¹ Does not include contribution balances for any participants currently in DROP

Net Pension Liability of the County

The components of the net pension liability of the County at December 31, 2015, were as follows:

Total pension liability	\$ 166,990,286
Plan fiduciary net position	(110,759,983)
County's net pension liability	<u>\$ 56,230,303</u>
Plan fiduciary net position as a percentage of the total pension liability	66.33%

Actuarial assumptions. The total pension liability was determined by an actuarial valuation as of December 31, 2015 using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
Mortality	RP-2000 Blue Collar Mortality tables with generational projection by Scale AA. A five-year set forward is used for post-disability mortality.

The above is a summary of key actuarial assumptions. Full descriptions of the actuarial assumptions are available in the January 1, 2015 actuarial valuation report.

Sensitivity of the net pension liability to changes in the discount rate

	<i>1% Decrease</i> <u>6.50%</u>	<i>Current Discount</i> <u>Rate</u> <u>7.50%</u>	<i>1% Increase</i> <u>8.50%</u>
County's net pension liability	\$ 76,814,405	\$ 56,230,303	\$ 39,158,592

¹ Amounts shown are based on pensionable earnings only. The payroll for 2014 has been changed to reflect the new GASB language.

Notes to Schedule

Valuation date:

Actuarially determined contribution amounts are calculated as of each January 1 for the upcoming County fiscal year beginning July 1. Actuarial valuations are performed every year.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Projected Unit Credit
Amortization method	Level percent of payroll (closed), increasing 3.0% per year.
Remaining amortization period	Remaining Amortization periods range from 7 to 27 years.
Asset valuation method	5-year smoothed market
Inflation	3.00%
Salary increases	Rates vary by participant age
Investment rate of return	7.50%, net of pension plan investment expense, including inflation
