D537900 Storm Drainage/SWM Infrastr (D

Class: Stormwater Runoff Controls

FY2020

Council Approved

**Description**

This project involves the study, design and construction of large, regional storm drain systems and stormwater management infrastructure to relieve widespread ponding or flooding of public and private properties and existing public infrastructure. This project also involves repair, rehabilitation and replacement of major culverts that are beyond their useful life. Environmentally sensitive design techniques will be identified and incorporated into the design to enhance the water quality of stormwater runoff. This project is countywide and multi-year and will require funding beyond the program. This multi-year project is continued as Project B551800 in the new Watershed Protection and Restoration Project Class.

Location

Countywide

**Benefit**

This project will correct large scale and widespread flooding conditions, improve storm drain conveyance on a community wide basis, enhance the water quality of runoff, and provide protection to existing public and private properties as well as existing public infrastructure.

**Amendment History**

Prior approval has been adjusted to show the closing of jobs on this project. County Council removed \$500k via amendment #80 to Bill 31-12.
