# School Bus Safety Camera Program

Special Operations Division
Traffic Safety Section
Automated Enforcement Unit

2023/2024 SCHOOL YEAR REPORT

CHIEF OF POLICE AMAL E. AWAD ANNE ARUNDEL COUNTY, MD

### **Anne Arundel County Police Department School Bus Safety Camera Program Philosophy:**

The School Bus Safety Camera Program is intended to create safer roadways for school children and pedestrians by modifying driver behavior to follow existing traffic law as it relates to school buses. The program seeks to supplement traditional enforcement to reduce the prevalence of motor vehicles overtaking and passing stopped school vehicles operating their alternately flashing red lights in violation of Maryland Transportation Article (TA) § 21-706. The program accomplishes its goals with the enabling authority of Anne Arundel County Ordinance No. 12-3-108 in accordance with operational provisions detailed in TA § 21-706.1, and in cooperation with the Anne Arundel County Public Schools (AACPS).

#### **Contract:**

The public safety traffic enforcement company BusPatrol America, LLC (BusPatrol), was awarded the school bus safety camera contract by AACPS in June of 2022. While the contract is executed by and between BusPatrol and AACPS, the Anne Arundel County Police Department (AACOPD) is regarded as a third-party beneficiary. The contract is for five (5) years with the option of a renewal thereafter. The contract term began in October 2022 and violation enforcement commenced on October 3, 2022, after a mandatory warning period during the month of September.

#### **Memorandum of Understanding:**

While the contract is executed by and between AACPS and BusPatrol with AACOPD as a third-party beneficiary, the AACOPD and AACPS executed a memorandum of understanding (MOU) to mutually engage in this school bus safety program.

#### **School Buses:**

The AACPS Transportation Division is primarily responsible for coordinating with both BusPatrol and school bus contractors regarding which buses get equipped or decommissioned. Furthermore, the AACPS Transportation Division is fully responsible for the determination of bus routes and bus stops.

#### **Violation Data:**

AACOPD can share general violation data with the AACPS Transportation Division to aid their planners in identifying high violation locations, roadways, and/or school buses. An example of this is at the end of this report.

#### **Program Evaluation:**

The prevalence of violations and corresponding citation issuance data is continuously evaluated. Monthly and year-end reports will identify the issuance of citations. Examples of this follow in the report.

#### **Review Process:**

Once a possible violation is detected by the artificial intelligence within the BusPatrol software, an event is generated. All relevant information needed to issue a citation is captured and sent to a processing center at BusPatrol for verification. After the processing center verifies the possible violation is worthy of police review, they are then sent to the Anne Arundel County Police Automated Traffic Enforcement Unit (ATEU) for final review.

#### ATEU staff follow the below listed steps while reviewing all possible violations:

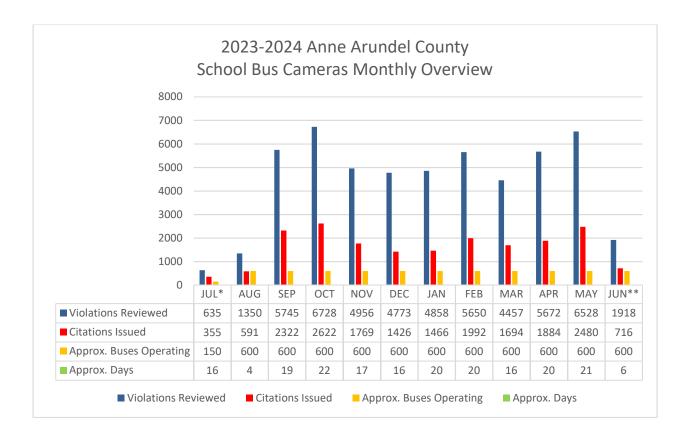

- Verify accused vehicle and confirm a violation occurred by looking at the still-photos and videos.
- Pause the video the very moment the red indicator goes on and the bus is fully stopped. Any vehicle at that moment located approximately 20 feet ahead or behind the bus could be a violation.
- Witness the yellow/amber warning indicator illuminated well before a red indicator in the video; or, the video should begin with a red/stop indicator already active.
- Ensure the bus is in a roadway travel lane and no raised or grassy medians divide the bus from the violator. A travel lane includes an acceleration or deceleration turn lane. A travel lane is not a shoulder.
- Check the map and zoom in to confirm the bus is in an acceleration/deceleration lane and not on a shoulder.
- Confirm the violation time on the video matches approximately the time listed in the software violation information.
- Confirm the tag is clear and legible and that the state listed in the software matches the tag image if possible. Confirm the make/type of vehicle is correctly listed with what picture/video show.
- Verify the location.
- If all criteria are met, approve the violation for citation issuance.
- Citation is generated, printed, and mailed by BusPatrol.

#### **Enforcement Overview:**

There were 53,270 school bus camera events submitted, from BusPatrol to AACOPD, to review for violations occurring between July 1, 2023 - June 30, 2024 (regular school calendar year including Summer School 2023). The AACOPD approved 19,317 of the total citations.

During the "Regular School Year" the Anne Arundel County Police Department ATEU staff reviewed an average of 295 events a day resulting in the issuance of an average of 98 citations per school day.

During the "Summer School Session" the ATEU staff reviewed an average of 39 events a day resulting in the issuance of an average of 22 citations per school day. The drop in volume over the Regular School Year is due to fewer busses operating (150), and fewer stops in high volume locations.

<sup>\*</sup> Summer School 16 days

<sup>\*\*</sup> School Year End June 11th
