Benefit Formulas

Your Final Average Basic Pay (FABP) multiplied by your years and months of credited service, multiplied by your Tier percentage.

Tier 1 (Contributory):

FABP x service credit x .02 = annual pension

Tier 2 (Non-Contributory):

FABP x service credit x .01 = annual pension

Retirement Calculation

Benefit examples:

Tier 1:

$$\$100,000 \times 30 \text{ yrs} \times 2\% = \underline{\$60,000} \text{ per year}$$

Tier 2:

$$\$100,000 \times 30 \text{ yrs} \times 1\% = \underline{\$30,000} \text{ per year}$$

Final Average Basic Pay

FABP is an average of your highest **three (3)** years annual basic pay during your entire employment with AACO as of the anniversary date of your date of termination.

However, if you had an involuntary salary reduction, then your FABP will be based on your last **five (5)** years only.

Retirement Payment Options

Modified Cash Refund

This is the normal form of payment. It provides you with a monthly benefit during your lifetime.

If you die before you receive an amount equal to your employee contributions including interest, the remainder will be paid to the last designated beneficiaries on file with the Office of Personnel.

Retirement Payment Options

Joint and Survivor Option

Under this option you may designate one joint annuitant, either a spouse or a child.

Upon your death, this person would receive 100%, 80%, 66 2/3% or 50% of your monthly pension for their lifetime.

Your monthly pension amount would be reduced based on the election you choose at retirement.

Retirement Payment Options

Joint and Survivor Pop-Up Options

If your joint annuitant predeceases you, your benefit “pops-up” (increases) to the amount of the Modified Cash Refund.

Under this option you may designate one joint annuitant, either a spouse or a child.

Upon your death, this person would receive 100%, 80%, 66 2/3% or 50% of your monthly pension for their lifetime.

Your monthly pension would be reduced based on the election you choose at retirement.

This option is not available for Tier 2 participants

Retirement Payment Options

Social Security Adjustment Option

The retiree is provided with a larger monthly pension benefit before age 62 and a smaller benefit thereafter. The sum of the pension plan benefit and the social security benefit is intended to remain level before and after age 62.

You may not combine this option with another option. This benefit ends at death of participant. There is no refund remaining contributions and interest.

Cost of Living Adjustments

Pension Benefit adjustments due to COLA's occur on July 1 of each year. There are two different portions of the COLA: one is applied to benefits earned (accrued) prior to February 1, 1997; the other is applied to benefits earned after January 31, 1997.

Pre 2-1-97 Benefit: 3% cap, simple

- Must be retired on or before June 1st
- First COLA will be prorated based on when you retire

Post 2-1-97 Benefit: 60% of CPI up to 2.5% cap, compounded

- To be eligible for first COLA, you must be retired on or before January 1st
