**B551600 Culvert and Closed SD Rehab**

**Project Class: Watershed Protection & Restor.**

## Description

**Dept:**

**DPW-WPRF**

*This project involves design and construction to rehabilitate, upgrade and replace small culverts on local roads and minor closed storm drain systems that, although functioning, are badly deteriorated, inadequate and in need of upgrades and, where practical, incorporate environmentally sensitive design techniques to enhance water quality. This project is countywide and multi-year and will require funding beyond the program. This project represents the continuation of Project D451100 under this new Project Class.*

## Benefit

This project will correct minor, localized ponding and flooding conditions, improve storm drain conveyance, rehabilitate and extend the useful life of existing storm drain systems and culverts while enhancing the water quality of runoff.

**B551800 Storm Drainage/SWM Infrastr (B**

**Project Class: Watershed Protection & Restor.**

## Description

**Dept: DPW-WPRF**

This project involves the study, design and construction of large, regional storm drain systems and stormwater management infrastructure to relieve widespread ponding or flooding of public and private properties and existing public infrastructure. This project also involves repair, rehabilitation and replacement of major culverts that are beyond their useful life. Environmentally sensitive design techniques will be identified and incorporated into the design to enhance the water quality of stormwater runoff. This project is countywide and multi-year and will require funding beyond the program. This project represents the continuation of Project D537900 under this new Project Class.

## Benefit

This project will correct large scale and widespread flooding conditions, improve storm drain conveyance on a community wide basis, enhance the water quality of runoff, and provide protection to existing public and private properties as well as existing public and private properties as well as existing public infrastructure.

Description

The sole purpose of this project is to serve as a "place holder" in the program years of the capital improvement program (CIP). In this way funding can be allocated in the CIP for the orderly pursuit of a large list of projects with the primary purpose of addressing the County's expected "Permit Cycle 3" requirements without requiring the premature identification of the most cost efficient and programmatically effective improvements.

This project will not be the subject of any appropriation and therefore no expenditures will ever accrue against this project.

Project Class: Watershed Protection & Restor.

DescriptionDept:DPW-WPRF

This project will serve to help fund monitoring, identification, and remediation efforts of PCBs countywide, including source tracking and the use of innovative remediation approaches to mitigate PCBs.

Benefit

This project constitutes a source of funding for countywide efforts to monitor, track, and remediate sources of polychlorinated biphenyls (PCBs) impacting local waterways. Legacy use of PCBs throughout the County has resulted in PCB Total Maximum Daily Loads (TMDLs) in several watersheds, creating a regulatory obligation to undertake this work.
