

COMMUNITY UPDATE

Beverly Triton Nature Park Shoreline Protection Project - Phase 2

January 20, 2026

This letter provides an update on the Beverly Triton Nature Park Shoreline Protection Project, which is being carried out in collaboration with The Resilience Authority of Annapolis and Anne Arundel County. The County is committed to keeping you informed and looks forward to gathering your feedback at the upcoming public meeting scheduled for later this year.

Project Scope

The design and improvements for Phase 2 of the project include extending the southern breakwaters and placing sand fill at Beverly Beach; repairing and armoring the outfalls for Deep Pond, Beverly Lake, and the Beverly Beach community; adding a breakwater and vegetated dune adjacent to the Deep Pond outfall; repairing a revetment adjacent to Deep Pond; and restoring the trail along Deep Pond.

Current Status

The project is currently at 30% design, and regulatory permit applications are being prepared. As part of the permit process, adjacent property owners will receive notification from the Maryland Department of the Environment.

Next Steps

The Resilience Authority and the Department of Recreation and Parks will hold a Public Meeting to review the project and receive input from area residents.
