H550700 Streetlight Conversion

Project Class:

Traffic Control

Description

Dept:

DPW-Hwys

Conversion of County-owned streetlights to LED streetlights in order to reduce operating costs. These funds will allow the acquisition of related services required to maintain the County's Street Light asset inventory.

Mercury vapor streetlights present a hazardous waste issue, requiring replacement by other fixtures as these burn out. Sodium vapor streetlights use significantly more energy than LED streetlights. LED streetlights have been added to BGE's inventory, reducing energy costs and eliminating annual maintenance costs.

Benefit

Improved efficiency of overall operation and regulatory compliance.

H563600 SL Pole Replacement

Project Class:

Traffic Control

Description

Dept:

DPW-Hwys

This project is to replace all pre-1996 street light poles and fixtures over a fifteen year period and will allow the acquisition of related services required to maintain the County's Street Light asset inventory.

The County owns approximately 12,000 fiberglass street light poles and fixtures on County roadways installed prior to 1996. Fiberglass poles and fixtures, generally have a lifespan of 20-25 years.

Benefit

Health/Safety, Rehabilitation and Replacement. Replacement of failing street light poles prevents potential injury to passers-by and/or damage to property, or potential safety hazard from failing fixtures. Older poles also "bloom", a condition where the fiberglass material delaminates and splinters. Replacing these poles eliminates the safety hazard to pedestrians brushing up against the splinters.
