B551600 Culvert and Closed SD Rehab

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project involves design and construction to rehabilitate, upgrade and replace small culverts on local roads and minor closed storm drain systems that, although functioning, are badly deteriorated, inadequate and in need of upgrades and, where practical, incorporate environmentally sensitive design techniques to enhance water quality. This project is countywide and multi-year and will require funding beyond the program. This project represents the continuation of Project D451100 under this new Project Class.

Benefit

This project will correct minor, localized ponding and flooding conditions, improve storm drain conveyance, rehabilitate and extend the useful life of existing storm drain systems and culverts while enhancing the water quality of runoff.

Project Status

- 1. Current Status Of This Project: Active
- 2. Action Taken In Current Fiscal Year: Construction
- 3. Action Required To Complete This Project: Construction

Changes from Prior Year

Countywide

B551700 Emergency Storm Drain (B)

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project involves the installation of storm drain inlets, manholes, pipes, small culverts and systems to provide for immediate relief to localized ponding or flooding of roads, public infrastructure and private properties subject to runoff from public facilities. This project is countywide and multi-year and will require funding beyond the program. This project represents the continuation of Project D478500 under this new Project Class.

Benefit

This project will correct localized ponding or flooding conditions, improve storm water conveyance, protect existing public and private properties as well as existing public infrastructure, and provide quick response to emergency storm water problems.

Project Status

- 1. Current Status Of This Project: Active
- 2. Action Taken In Current Fiscal Year: Construction

Anne Arundel County, Maryland

B551800 Storm Drainage/SWM Infrastr (B

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project involves the study, design and construction of large, regional storm drain systems and stormwater management infrastructure to relieve widespread ponding or flooding of public and private properties and existing public infrastructure. This project also involves repair, rehabilitation and replacement of major culverts that are beyond their useful life. Environmentally sensitive design techniques will be identified and incorporated into the design to enhance the water quality of stormwater runoff. This project is countywide and multi-year and will require funding beyond the program. This project represents the continuation of Project D537900 under this new Project Class.

Benefit

This project will correct large scale and widespread flooding conditions, improve storm drain conveyance on a community wide basis, enhance the water quality of runoff, and provide protection to existing public and private properties as well as existing public infrastructure.

Financial Information

Initial Total Cost Est: \$6,000,000
Year First Apprvd: 2014
Est. Operating Budget Impact: Between \$500,000 & \$750,000 per year

Anne Arundel County, Maryland

B554800 PT-ST-07

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

Patapsco Tidal - Streams with Nearby Outfalls & Ponds - Project Group: 07 - Priority Rating: Red

This project is for the design and construction for stormwater management infrastructure improvements necessary to comply with Federal and State clean water requirements. This project includes assessment of approximately 23 Outfalls and 11 Stream Segments (16,829 Lineal Feet). After assessment was performed, two new watershed BMPs are proposed and 10,655 linear feet of stream is proposed for restoration.

Benefit

Water Quality Improvement and Regulatory Compliance

B561100 WPRP Restoration Grant

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project involves funding for a competitive, community restoration grant program administered by the Chesapeake Bay Trust. The restoration work accomplished through this program assists in the attainment of the County's clean water goals and compliance with its stormwater permits. This project is countywide and multi-year.

Benefit

Allows third-party partners to assist the County with achievement of its NPDES MS4 and Chesapeake Bay TMDL goals.

B568200 Barrensdale Outfall Rest. Cont

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This Project is for right-of-way acquisition and construction of stream restoration to a highly eroded stream channel from the outfall from the public stormwater management pond at Barrensdale Drive in the Magothy River Watershed. Construction includes modifications to the public stormwater management pond and restoration to the natural channel below the outfall. This project is to continue and complete the work begun under project Q551500 now that all ROW issues are resolved.

Benefit

Provide water quality treatment for the outdated pond's drainage area, thereby contributing to regulatory compliance under the County's NPDES MS4 Permit. The project will improve hydrology and ecology for the downstream channel.

Financial Information

Initial Total Cost Est: \$1,051,000
Year First Apprvd: 2017
Est. Operating Budget Impact: Indeterminate

B577500 Permit Cycle 3 Placeholder

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

The sole purpose of this project is to serve as a "place holder" in the program years of the capital improvement program (CIP). In this way funding can be allocated in the CIP for the orderly pursuit of a large list of projects with the primary purpose of addressing the County's expected "Permit Cycle 3" requirements without requiring the premature identification of the most cost efficient and programmatically effective improvements.

This project will not be the subject of any appropriation and therefore no expenditures will ever accrue against this project.

Benefit

Water Quality Improvement and Regulatory Compliance

B582500 Clark Station Rd Resilience Im

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project is for the design, permitting and construction of drainage improvements in the vicinity of Clark Station Road and Burns Crossing Road in Severn, including acquisition of properties or easements in the vicinity that will be negatively impacted by the improvement of drainage. Additionally, the project includes the acquisition/easement of some upstream parcels in order to provide additional resiliency for the drainage system and to ensure conditions do not worsen.

Benefit

This project will localized ponding and flooding conditions, improve storm drain conveyance, and protect existing natural areas in the watershed while enhancing the water quality of runoff.

Project Status

1. Current Status Of This Project: Active
2. Action Taken In Current Fiscal Year: Planning, Design
3. Action Required To Complete This Project: Design, ROW, Construction, Performance

B594600 Water Quality Utility Protect

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project constitutes a collaborative partnership with the Bureau of Utility in an effort to share the cost of Construction and CMI services for the restoration of highly incised channel and an exposed sewer line along Piney Run in an effort to reduce nutrient pollution to local waterbodies.

Benefit

Water Quality Improvement and Regulatory Compliance

B551900 Stormwater Project Management

Project Class: Watershed Protection & Restor.

Description

Dept: DPW-WPRF

Funds are requested to provide contract services for project management of stormwater class projects during design, right of way acquisition, construction and performance. Funding for this project will be reimbursed by the individual capital projects to be managed.

Benefit

Improved efficiency during execution of the capital improvement program.

Financial Information

Initial Total Cost Est: \$2,600,000
 Year First Apprvd: 2014
 Est. Operating Budget Impact: Between \$50,000 & \$100,000 per year

Description

Patapsco Non-tidal - Stand Alone Outfalls - Project Group: 01 - Priority Rating: Red

This project is for the design and construction for stormwater management infrastructure improvements necessary to comply with Federal and State clean water requirements. This project included the assessment of 17 outfalls for restoration and improvements. Currently, 1,000 linear feet of stream restoration are moving to Schematic Design and 2 BMP's are moving forward to Design Development.

Benefit

Water Quality Improvement and Regulatory Compliance

B561000 WPRP Land Acquisition

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

The project allows for the advance land acquisition at sites where future B-Class projects will occur or where flood prone and/or natural resource rich properties can be preserved to assist the County achieve environmental regulatory goals. Funding is included for the demolition of structures. The project is county-wide and multi-year.

Benefit

Improved efficiency during execution of the capital improvement program.

Financial Information

B568000 Shipley's Choice Stream Restor

Project Class: Watershed Protection & Restor.
Dept: DPW-WPRF

Description

This project consists of the design and construction of a stable stream and wetland system in the Shipley's Choice community to provide water quality and stability benefits in the area downstream of a proposed dam removal project. The eroding channel discharges sediments and pollutants into a tributary of the Severn River.

This stream restoration work is moved from project Q543000 in the Water Quality Improvement Class to this new project. This project will also include the BMP/Outfall Retrofit, moved from B558100. The Phase 1 Schematic Design was accomplished under Q543002 and B558109. Phase 2 Design Development through Construction will be accomplished under B568000.

Benefit

Water quality and stability benefits in the area upstream of a proposed dam removal project.

B588700 Septic-To-Sewer Subsidy

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project constitutes an additional source of funding to incentivize local property owners to connect their conventional septic systems to public sewer in an effort to reduce nutrient pollution to local waterbodies. This work is recognized by MDE as a restoration practice that is eligible to count towards the County's MS4 stormwater permit compliance.

Benefit

This project will serve to help offset the costs of septic-to-sewer conversion for private landowners who are seeking to accomplish that work, and is intended to be used in concert with other public and private sources of funding to accelerate the conversion of conventional septic systems to public sewer.

B588800 Patuxent OxBow Restoration

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project is for the design and construction of stream and wetland restoration projects necessary to comply with Federal and State clean water requirements in the vicinity of the Patuxent Oxbow watershed. This work will help satisfy both MS4 and local Total Maximum Daily Load (TMDL) requirements.

Benefit

Water Quality Improvement and Regulatory Compliance

B588900 PCB Monitoring & Remediation

Project Class: Watershed Protection & Restor.

Dept: DPW-WPRF

Description

This project will serve to help fund monitoring, identification, and remediation efforts of PCBs countywide, including source tracking and the use of innovative remediation approaches to mitigate PCBs.

Benefit

This project constitutes a source of funding for countywide efforts to monitor, track, and remediate sources of polychlorinated biphenyls (PCBs) impacting local waterways. Legacy use of PCBs throughout the County has resulted in PCB Total Maximum Daily Loads (TMDLs) in several watersheds, creating a regulatory obligation to undertake this work.
